

JULY 22nd (TUE)

会場：コラーニングII 3F プレゼンテーションルーム

(通常と会場が異なりますのでご注意ください。)

● **Presentation 1 14:30 – 16:00**

Title

Networked Information Processing and the Japanese Sense of Information Privacy

Abstract

There is a myth amongst researchers that there is no such thing as 'Privacy' in Japan. Dr Adams refutes that and shows that the advent of networked information processing of personal data has brought Japanese attitudes to information privacy to a highly similar position to Western attitudes. Grounded in the social and psychological literature about Japan, this work explains the emergence of Japanese legal protection for personal data in recent years.

Speaker : Dr. Andrew A. Adams, School of Systems Engineering, The University of Reading, UK.

Dr Adams spent nine months in 2007 as a visiting Professor at Meiji University in Tokyo, funded by a Global Research Award from the Royal Academy of Engineering. He has been studying the legal and social approach to privacy of electronic data in Japan and will present some of the results of his study.

● **Reception 16:30 – 18:30**

The seminar will be followed by a reception in La Pause (2F at Student Union Building) from 16:30.

If you are interested in joining the seminar and reception, please inform us by e-mail(iguchi@ba.ritsumei.ac.jp) or telephone(tel.077-561-3098)for preparation purposes.
