

## Issuance of Certificates of Health (for Graduating or Completing Students in AY 2021)

Ritsumeikan University Medical Service Center

### 1. Medical Examinations for AY 2021

#### (1) Issuance Period for Certificates of Health for Job Applications

The issuance period for Certificates of Health for job applications will be decided in consultation with the Career Center, taking into consideration the status of employment examinations and the processing of medical examination results (e.g., interpretation of chest x-ray images, etc.).

Please check the following URL for the current year's status.

Certificate of Health for job applications

No.3760082386

#### (2) Issuance Method of Certificates of Health for Employment

If you have taken Ritsumeikan's Annual Medical Examination, a Certificate of Health for employment can be issued using automatic certificate issuing machines installed on each campus (including the Tokyo Campus and Osaka Umeda Campus). However, please note that if there are any abnormalities in the results of your medical examination, it may not be possible to issue a certificate without a re-examination. This service is only available to students who are expecting to graduate/complete. If you are unable to issue the certificate automatically, please check with the Medical Service Center.

The locations and operating times of the automatic issuing machines can be found on the Ritsumeikan University website → Current Students → Student Support Site for Current Students → Issuance of Certificates, Certificate Stamps, and Student Discount Certificates → (1) Automated certificate-issuing machine.

#### (3) If you have not undergone 2021 student medical examination yet, please check the URL below.
