Tuesday

13:30-14:30

The 72nd
AJI Frontier Seminar

Presentation:

Dr. Kunapasut VariyaSenior Researcher, Ritsumeikan
Asia-Japan Research Organization,
Ritsumeikan University

The Spillover Effects of Population Control Policies: Empirical Evidence from Vietnam

This presentation will show evidence that the population control policy implemented in 1989 exhibited an increase in the likelihood of being a single child or having only one sibling. Additionally, it will examine the spillover effect on the ethnic minority group which was not targeted. The presentation shows that the effect of the policy is present both in the Kinh as well as non-Kinh ethnic groups.
