International Relations, Ritsumeikan
University

Leveraging the Synergy of Scientific Technology and Agronomic Practices: Exploring the Possibility of Enhancing Community Development in India

For India, with its rapidly growing population, food security is crucial, and advanced technology has been playing a pivotal role in expanding agricultural production. This presentation introduces a scientific methodology for planning agronomic practices and community development aimed at transforming rural communities in India. It focuses on imparting new skills and fostering agribusiness opportunities to empower these communities for sustainable growth.
