A message to students learning foreign languages /外国語を学ぶ学生へのメッセージ

The most important thing is not to worry about making mistakes and not to stress when you cannot remember vocabulary. Use other strategies of communication, such as gestures and simple drawing. Always have a dictionary or translation tool handy, but only use as a last resort when other strategies of communication fail. Practice speaking every day. There are AI apps designed to help you practice real life conversations e.g. TalkPal. With so many resources available on the internet, language learning has never been easier or more accessible. If you put in the time and effort, you will succeed even if your language learning ability is low.
