# THE RITSUMEIKAN CHARTER

---

Ritsumeikan traces its roots to Kinmochi Saionji's private academy of the same name. It was officially founded in 1900 by Kojuro Nakagawa as the Kyoto Hosei Gakko (Kyoto School of Law and Politics), later taking on the name "Ritsumeikan." The name is derived from a passage in the Jinxin chapter of the Discourses of Mencius and means "a place to establish one's destiny through cultivating one's mind." We who gather at Ritsumeikan uphold our founding spirit of "Freedom and Innovation" and embrace "Peace and Democracy" as our educational philosophy.

Ritsumeikan, in light of the painful experiences of World War II and sincerely looking back on history, rejects war and violence, advances democratic academy governance, and continues to pursue the ideal of peace. Ritsumeikan will continuously pursue internationalization, and as a comprehensive private academic institution, we will strive to contribute to society through the freedom to pursue new endeavors and creativity with the participation of students at every level of education, faculty, and staff as well as the support of alums, guardians, and all those involved with the academy.

Ritsumeikan respects diversity. We value the dignity that everyone equally possesses, and we honor the emergent potential that resides within every individual. While being rooted in local communities, we collaborate with a wide range of actors inside and outside of the academy as we strive for self-growth and the realization of an inclusive society through diverse activities such as research, education, culture, art, and sports.

Ritsumeikan, founded on the freedom of academic inquiry and research, will pave the way to the future. Upholding the principles of autonomy, democracy, fairness, transparency, and non-violence, we will boldly take on the challenge of intellectual creation that will bring about new values of harmonious coexistence to be shared far and wide. We will carry on the spirit of "believe in the future and live for the future," and, inscribing in our minds that our respective research and educational activities as both a research university and an inquiry-driven academy will shape the world of the future, we will devote ourselves to the creation of a sustainable society and the realization of world peace.

The Ritsumeikan Trust  
Established July 21, 2006

E Graduate Schools that enable students to earn a degree by getting necessary credits only in English.

 Evening classes offered. See the graduate school's website or contact directly for details (p. 34).

SEP September Enrollment is available (Not all majors may be eligible. See Application Guidelines for details.)

\* As of April 2027, the establishment of a doctoral program in Graduate School of Science in Arts and Design is currently under consideration. The plan is provisional and subject to change.

# Rooted in community, collaborating with the world: 4 campuses providing the basis for study & research

Kansai has long prospered as a cultural, political and economic center of Japan. In addition to possessing many World Heritage sites and National Treasures that have been passed down through Japanese history, Kansai with its unique characteristics and attractiveness, is symbolized by the ancient capital of Kyoto, the rich natural environment of Shiga, and Osaka, the city of business, all cosmopolitan cities distinguished worldwide which continue to evolve day by day. The four campuses, located in areas with their own distinctive characteristics, cooperate with each other to undertake cutting-edge initiatives that contribute to the development of humankind, nature and local communities.

## ■ Facilities, Equipment and Learning Environment

There are many facilities available to graduate students researching at Ritsumeikan University. These facilities offer various features in order to accommodate a variety of research and study styles.

### Communication spaces for sharing research achievements

There is an open space where graduate students can share ideas and research achievements through meetings, workshops and presentations and communicate with each other and members of faculty. Users are also able to hold open-style seminars and poster sessions. There is also a lounge equipped with a kitchen and a counter where you can take a short break from your research.

Kyuronkan Performing Space (Kinugasa Campus)

### Space for group meetings and discussions

This space allows students to conduct group work such as joint research or have a casual group meeting. PCs and printers are available.

Kyuronkan Space for Group Meetings and Discussions (Kinugasa Campus)

### Spaces where graduate students can concentrate on their studies and research without being interrupted

Graduate Study Rooms emphasize quietness, offering an atmosphere where graduate students can concentrate without being interrupted. The numerous partitioned-off carrel desks provide graduate students with a semi-private space to work on theses and presentation materials.

Graduate Study Room (OIC)

### Libraries: one of the largest book collections in Japan

The number of books in the collection is among the highest in private universities (About 3.5 million books), and many highly specialized research materials are stored in each reference room. Graduate Students can borrow 100 books for 100 days.

Hirai Kaichiro Memorial Library (Kinugasa Campus)

## CAMPUS

### Kinugasa Campus in KYOTO

A campus where graduate schools specializing in the arts, humanities and social sciences come together with the living and breathing history and culture of the ancient capital city of Kyoto

Surrounded by numbers of cultural heritages, Kyoto with its long and deep history has been a core city of Japan since ancient times. The campus is located in a quiet area of the city where many famous temples are situated. Kinugasa campus combines tradition and innovation in a place where students are able to disseminate cutting-edge research to the world while being surrounded by Japanese tradition and culture.

- Graduate School of Law ● Graduate School of Sociology
- Graduate School of International Relations ● Graduate School of Letters
- Graduate School of Science in Arts and Design
- Graduate School of Language Education and Information Science
- Graduate School of Core Ethics and Frontier Sciences

### Biwako-Kusatsu Campus in SHIGA

A campus where world-class research and education are offered in a serene and natural environment

Offering top tier science education and equipped with some of the largest research facilities, Biwako-Kusatsu Campus (BKC) is a campus where students can conduct research activities that take advantage of the campus's location surrounded by nature and nearby Lake Biwa, and where numerous companies have established their own research facilities. It is an innovative campus which creates and disseminates world-class educational research, knowledge and technologies to all regions of the globe.

- Graduate School of Economics ● Graduate School of Sport and Health Science
- Graduate school of Gastronomy Management
- Graduate School of Science and Engineering
- Graduate School of Life Sciences ● Graduate School of Pharmacy

### Osaka Ibaraki Campus in OSAKA

A campus promoting the dissemination of education and research in Asia from the mercantile city of Osaka

The Osaka Ibaraki Campus (OIC) is located in Ibaraki City in Osaka Prefecture. Osaka is one of the biggest international and commercial centers in Japan, and the campus is expected to facilitate collaboration with industry and government institutions, promote the Ritsumeikan Academy's activities on the frontline of social collaboration and exchange, and support the further development of students.

- Graduate School of Business Administration ● Graduate School of Public Policy
- Graduate School of Human Science ● Graduate School of Image Arts
- Graduate School of Information Science and Engineering
- Graduate School of Technology Management
- Graduate School of Management

### ■ Satellite Campus: Osaka Umeda Campus

A campus conveniently located near Umeda Station in Osaka

In addition to providing employment support and assistance with establishing strong social networks, this campus is a base for studies and research that offers many graduate courses. It is outfitted with the latest research equipment and facilities, providing students with the necessary means to accomplish a wide variety of tasks.

### Suzaku Campus in KYOTO

A campus conveniently located in the historical and cultural center of Kyoto and outfitted with modern facilities

This campus provides students at its professional graduate schools with excellent research equipment and facilities catering to a wide variety of research styles as well as providing environments for self-study. Located in the center of Kyoto, Suzaku Campus provides the convenience of an urban-style campus while being surrounded by Japanese history and culture.

- School of Law
- Graduate School of Professional Teacher Education

# Faculty Voice

Professor **CHIKAMOTO, Tomoyuki**  
Graduate School of Science and Engineering

## The Appeal of Graduate School Is the Freedom to Try “Learn and Practice”

My profession is architecture. The study of architecture is very ancient, and the introductory book on architecture called “The Ten Books on Architecture” by Vitruvius, which is still read today, was written around the turn of the era. The focus in this book is on both production and theory, and no lack of either is allowed. Steve Jobs, who created the iPhone, said, “Technology alone is not enough—it’s technology married with liberal arts, married with the humanities, that yields us the results that make our heart sing.” When renovating a school building at an elementary school, I worked with the elementary school faculty, students, residents who use the facility, and construction workers to consider an environmentally friendly renovation plan, renovate the facility, and use the facility as a teaching tool to evaluate the effectiveness of the adopted technology.

It is not good to be all theory and no practice, but simply putting things into practice is not enough either. It is important to simultaneously practice considering social skills, cultural backgrounds and applying and utilizing this knowledge in practice while acquiring fundamental academic knowledge and a wide range of information with

## Interview 01

**Herczeg Fanni**

Doctoral Program in  
International Relations

### Q1 Why did you decide to pursue a graduate degree?

Before coming to Ritsumeikan, I did not intend to pursue my studies further to a PhD. My initial plan was to complete my Master’s degree and then begin working, preferably in a field closely related to my current studies. However, my perspective changed halfway through my Master’s programme. The experience I gained through conducting my research encouraged me to explore the subject on a deeper level. The professors at the university also provided tremendous support in helping me develop the skills and experience necessary for research; without their guidance, I would not have decided to continue my studies at the university. The combination of these factors changed the initial perspective I had.

### Q2 Why did you decide to study at Ritsumeikan University?

My decision to study at Ritsumeikan was based on several factors. I wanted to conduct my research in English, not because I am opposed to Japanese, but because in life, but especially in international relations it is important to engage in discussions that are accessible to a wider audience. When looking into programmes in Japan, Ritsumeikan stood out as one of the stronger options for studying international relations in English. The location in Kyoto was also an important personal factor for me. Beyond that, the university offers solid access to archives and academic journals, which is essential for the kind of research I am doing and makes the research process more manageable.

### Q3 What is it specifically, that your program offers, that attracted you?

As I mentioned before one of the main things that attracted me to the programme was the ability to conduct research in English within an international relations framework while studying in Japan. The programme also places a strong emphasis on independent research, which was important for me, as I wanted to focus on developing my own research topic in depth rather than only following structured coursework. In addition, the academic environment allows for engagement with both theoretical approaches and empirical analysis, which fits well with the kind of research I am doing.

### Q4 Would you describe your research theme?

My research examines how nuclear energy is framed in Japan through both media coverage and institutional narratives. I focus on how nuclear-related incidents and broader energy policies are presented, and whether they are treated as serious security concerns or as manageable, technical issues. Building on my previous work, I extend this analysis beyond individual accidents to look at longer-term patterns before and after the Fukushima disaster. By analysing both newspaper articles and policy-related materials, I aim to understand how certain ways of presenting nuclear energy contribute to maintaining a sense of normality around it. More broadly, my research explores how these narratives shape public perception and support the continued legitimacy of nuclear energy in Japan.

### Q5 Would you describe some of the good things about graduate school at Ritsumeikan University?

One of the good things about graduate school at Ritsumeikan is the level of support you receive while still being encouraged to work independently. You are given the space to develop your own research, but at the same time there is guidance available when you need it. I also found it helpful that there are students from different backgrounds, which creates a more open academic environment and allows for different perspectives in discussions. In addition, the access to academic resources, such as journals and library materials, makes it easier to carry out research. Overall, it is an environment where you can focus on your work while also having support from both faculty and other students.

### Q6 Would you share your plans for after graduation?

After graduation, I plan to continue in academia and further develop my research. I would like to focus on expanding my current work and contributing more broadly to discussions within international relations, particularly in relation to media, policy, and nuclear energy. At the same time, I remain open to opportunities where I can apply my research outside of academia, especially in areas where analysis and policy-related work are relevant. Overall, my goal is to build on the experience and skills I have gained during my studies and continue working in a field closely connected to my research.

### Q7 What advice do you have for new graduate students?

Do not be afraid to ask questions, whether it is your professors or other students. Starting in a new academic environment can feel overwhelming, but being open to others helps you settle in more quickly. This applies to your research as well. Talking to other students about your work and hearing their perspectives can be extremely useful, especially when you are very focused on your own approach. It helps you see things you might otherwise miss. I would also strongly recommend making use of spaces like the master’s room and the library, as they are important not only for studying but also for connecting with others. If you face any difficulties, do not hesitate to speak up, as both the university and your peers are there to support you.

interest. The experiences from my student days, when we sometimes lost track of time while discussing various topics, and whenever we encountered something interesting or unknown, we would actually research and try it out, are still valuable to me today.

## Graduate School Forms the Foundation for the Future of Your Life

In the graduate schools of science, many students (graduate students and graduation research students) gather in laboratories and work on a daily basis. This includes colleagues from the same laboratory who share good times and hardships through mutual encouragement, researchers from outside the university and abroad who collaborate with in academic activities and joint research, as well as young people of the same generation. Research is not something that can be carried out alone. We proactively incorporate opportunities to broaden interdisciplinary perspectives, such as across different fields and across the humanities and sciences, to form rich networks that will provide intellectual nourishment not only during graduate school but also throughout students' future careers. Two years of graduate school (master's course) is a very short time in this day and age when life expectancy is said to be 100 years. However, the experiences you have during this time will become the roots that sustain you for the next 50 years or more of your life after you take your place in society. I urge you to spend time in graduate school to grow into a large tree with firm roots.

## Interview 02

**Mudit Paliwal**

Master's Program in  
Advanced Information Science  
and Engineering

### Q1 Why did you decide to pursue a graduate degree?

I decided to pursue a graduate degree because I want to deepen my knowledge in the rapidly advancing field of artificial intelligence and engage in meaningful research. In particular, I am interested in the applications of large language models across different domains and their potential to solve complex real-world problems. I have also long been interested in virtual environments with AI agents, and I hope to contribute to this area by studying how such agents act and respond to different situations within virtual simulations. Graduate study provides the ideal environment to develop these interests through structured learning, expert guidance, and focused research opportunities.

### Q2 Why did you decide to study at Ritsumeikan University?

I chose to study at Ritsumeikan University because of its strong academic reputation in Japan and its growing international recognition. The university is known for providing high-quality education, modern research opportunities, and a practical approach to learning. I was particularly attracted by the opportunity to study in an environment that values innovation, independent thinking, and hands-on research experience. In addition, the availability of English-taught programs makes Ritsumeikan University an excellent choice for international students who wish to pursue advanced studies while adapting smoothly to life in Japan.

### Q3 What is it specifically, that your program offers, that attracted you?

I was attracted to the master's program at the Graduate School of Information Science and Engineering because of its modern and forward-looking curriculum that aligns with current industry and research standards. The program places strong emphasis on practical skills, advanced technical knowledge, and encourages students to challenge themselves by exploring opportunities beyond their comfort zones. I was also particularly drawn to the Intelligent Computer Entertainment Laboratory (ICE Lab). The lab is recognized for its research contributions in the field of technical game research, and I am grateful to be part of such a prestigious laboratory where I can learn, grow, and contribute through research. The opportunity to study and conduct research in such a specialized and innovative environment was one of the key reasons I chose this program and laboratory.

### Q4 Would you describe your research theme?

My research focuses on how Large Language Models (LLMs) can support human researchers in generating innovative and practical research ideas across a wide range of academic fields. The goal is to develop AI systems that assist with idea generation, problem analysis, and proposal development, helping researchers work more efficiently and explore broader possibilities. To achieve this, I am developing a virtual research laboratory where multiple AI agents collaborate in a manner similar to a real research team, taking on different roles to refine concepts and transform ideas into actionable outcomes. This research combines Natural Language Processing (NLP), prompt engineering, and multi-agent systems to create an intelligent environment for research support. In the future, I hope this work can accelerate innovation, encourage interdisciplinary collaboration, and make advanced research support more accessible worldwide.

### Q5 Would you describe some of the good things about graduate school at Ritsumeikan University?

One of the strengths of graduate school at Ritsumeikan University is its strong approach toward research and academic development. The university encourages students to think critically, explore new ideas, and pursue innovative work within their areas of interest. With guidance from experienced faculty members and access to specialized laboratories, students are able to develop their skills in an environment that supports creativity, independence, and meaningful research progress. Another valuable aspect is the strong reputation and network associated with Ritsumeikan University. Its respected academic standing, accomplished alumni community, and industry connections can create valuable opportunities for students after graduation. I believe this combination of research excellence, creative freedom, and long-term career support makes graduate study at Ritsumeikan University highly rewarding.

### Q6 Would you share your plans for after graduation?

After graduation, I am considering both professional opportunities and further academic study as my next step. I hope to pursue a career where I can keep working on my research interests while contributing to impactful and meaningful work. I would appreciate an environment where I can contribute professionally while staying involved in research and academic activities. At the same time, I am also interested in pursuing a PhD to deepen my knowledge and further strengthen my research abilities. Whichever path I choose first, my aim is to keep developing my expertise and build a career through which I can make meaningful contributions in research, innovation, and lifelong learning.

### Q7 What advice do you have for new graduate students?

My advice for new graduate students is to make the most of every opportunity at Ritsumeikan University. As one of the most respected universities in Japan with strong international recognition, it offers a wide range of academic fields, excellent research facilities, and guidance from experienced professors. Use these resources actively to strengthen your knowledge and develop your research skills. I would also encourage new students to remain curious, manage their time effectively, and maintain open communication with professors and fellow students. Graduate study is not only about academic achievement, but also about building meaningful connections, gaining valuable experiences, and preparing for your future career. Make the most of your time at Ritsumeikan University and face each challenge with confidence and determination.

# Initiatives for Fostering Early-career Researchers

At Ritsumeikan University, graduate students are considered “early-career researchers” in its Research Advancement Plan, a collective effort to improve research capabilities of the University as a whole, and they are provided rather generously with diverse support according to their respective career stages, in addition to fundamental research support.

Currently, there are approximately 4,000 graduate students enrolled across 22 Graduate Schools, who are engaged in research on a daily basis to become highly specialized human resources with deep expertise and social implementation skills.

The following are some of our signature initiatives.

## ■ RARA (Ritsumeikan Advanced Research Academy) Student Fellowship Program (RARA x SPRING, RARA x BOOST)

Outstanding and highly-motivated graduate students in the doctoral course are provided with research grants as well as research activity support grants (equivalent to living expenses) to enable them to devote themselves to interdisciplinary and advanced research. Currently, about 125 graduate students have been selected as “RARA Student Fellow” and they are working to develop their potential as early-career researchers who will lead the future of academia or as highly specialized human resources who will be active in industry.

## ■ Support programs provided by the Graduate Student Career Path Support Center

The Ritsumeikan University Graduate Student Career Path Support Center provides career path formation support specific to graduate students. In addition to fundamental support including various scholarship programs, the Center also provides support that responds to contemporary issues, such as seminars aimed at cultivating transferable skills, thereby presenting diverse and attentive support.

“Graduate Student Career Path Support Center, Ritsumeikan University” Website  
[https://en.ritsumei.ac.jp/ru\\_gr/g-career/](https://en.ritsumei.ac.jp/ru_gr/g-career/)

## ■ Research outreach activities

Ritsumeikan University’s graduate students refine their research outreach skills through a variety of internal and external opportunities to communicate their research interests to wider society in an easy-to-understand and appealing manner.

Rice Ball Seminar: Research seminars for affiliated and partner schools

Poster sessions by graduate students

Research presentations

## ■ Ri-SEARCH (Ritsumeikan University Search Engine of Academic Record and Career History of Young Researchers)

Graduate students register their own research achievements in a dedicated database. Please refer to the following URL to search for research achievements.

<https://gyoseki.ritsumei.ac.jp/ritgshp/KgApp/TOP?lang=en>

# Research Organizations, Institutes, and Centers

Research organizations at Ritsumeikan University deploy various efforts to develop cutting-edge research. Such research contributes to society, and in turn leads to the advancement of research and education within the graduate schools. In order to promote research in the fields of the humanities, social sciences, and natural sciences, RU has established various research institutions and conducts a wide variety of research activities from basic to applied research. Those institutions also facilitate collaborations with industry and government institutions, working to get results that give back to society.

\* The following outlines information regarding research organizations, research institutions, and research centers as of March 1, 2026.

## Ritsumeikan Global Innovation Research Organization (R-GIRO)

R-GIRO is a research organization under the direct supervision of the University President that was established in 2008 with the goal of "forming a research hub specifically for policy-driven research" and "strengthening the development of young researchers who will lead the next generation." The organization aims to contribute to the next generation of society by producing valuable research findings and actively disseminating those findings through the promotion of interdisciplinary research activities that integrate the fields of natural science with those in the humanities and social sciences in order to achieve a society that maintains a type of harmony between humans and nature.

## Ritsumeikan Asia-Japan Research Organization

The Ritsumeikan Asia-Japan Research Organization is a research organization under the direct supervision of the University President. With the mission, "Cultivating Asia-literate, globally-capable human resources and contributing to the development of a common vision for the future of Asia and Japan," it promotes research that contributes to the "Asian Era" that is both strategic in nature as well as possessing concepts one would come to expect from Ritsumeikan. Serving as the nucleus of a diverse research network in collaboration with various institutions within Japan and overseas, it aims to promote Asia-Japan research from a global perspective. The organization focuses its efforts on conducting comprehensive practical research that possesses the essence of the keywords, "Symbiosis," "Co-creation," and "Co-commitment," and disseminating the results of such research.

■ Asia-Japan Research Institute

## Kinugasa Research Organization

Kinugasa Research Organization was founded in 1998 and it supports research activity as a research organization which manages the research institutes and research centers. The organization's goal is to contribute to human welfare and social progress under the four principles of "autonomy," "democracy," "openness," and "peaceful use".

- Institute of Humanities, Human and Social Sciences
- Institute of International Relations and Area Studies
- International Institute of Language and Culture Studies
- Institute of Human Sciences ■ Art Research Center
- Institute of Disaster Mitigation for Urban Cultural Heritage
- Shirakawa Shizuka Institute of East Asian Characters and Culture
- Institute of Ars Vivendi ■ Research Centers\*

## BKC Research Organization of Social Sciences

BKC Research Organization of Social Sciences was established in 1998 in order to promote industry-academia- government collaborations in Social Sciences at Biwako-Kusatsu Campus (BKC). We also aim to promote interdisciplinary research through exchanges with Natural Sciences in cooperation with the Research Organization of Science and Technology.

■ Institute of Social Systems ■ Research Centers\*

## Research Organization of Science and Technology

The Research Organization of Science and Technology was established in 1994 as the Research Organization of Science and Engineering (changed to its present name in 2012) to contribute to the development of science and technology and local society. The organization's goal is to contribute to local society through joint research in industry-academia-government collaborations.

- Institute of Science and Engineering
- Synchrotron Radiation Center ■ VLSI Research Center
- Institute of Advanced Research for Sport and Health Science

# Tuition for 2026

Please note that the university fee is composed of the "admission fee" and "tuition fee".

\* The tuition fee students who entered the university in September pay as part of the admissions procedure covers tuition for the Fall Semester of the first year only.

\* Tuition may be revised when social factors, such as rapid inflation, have a significant impact on the University.

\* The Graduate Degree Programs offered in Japanese are not including in the table below.

\* Tuition for 2027 will be announced by mid-July on the website below.

<https://www.ritsumei.ac.jp/gr/en/scholarship/tuition.html/>

## Admission Fee

(JPY)

Category	Fee
-Admission	200,000
-Transfer Admission	200,000

Notes:

- 1) Payment of the admission fee is required in the year of admission only.
- 2) The students from Ritsumeikan Academy\* are not required to pay the admission fee. For more information, please refer to the Application Guidelines.

\*Ritsumeikan University and Ritsumeikan Asia Pacific University (APU)

## Tuition for students enrolled in the 2026 Academic year

### <September Enrollment>

Fall semester Tuition: Tuition from September 26 to March 31

Spring semester tuition: Tuition from April 1 to September 25

### <April Enrollment>

Spring semester tuition: Tuition from April 1 to September 25

Fall semester Tuition: Tuition from September 26 to March 31

## Tuition for Master's Program

(JPY)

Graduate School (English-based Program)	1st Year		2nd Year	
	Spring Semester	Fall Semester	Spring Semester	Fall Semester
-Policy Science	418,000	418,000	418,000	418,000
-Economics (MPED)	501,600	501,600	501,600	501,600
-International Relations (GIRP)	501,600	501,600	501,600	501,600
-Science and Engineering				
(except for Mathematics Course)	640,900	640,900	640,900	640,900
(Mathematics Course)	599,100	599,100	599,100	599,100
-Information Science and Engineering	633,800	633,800	633,800	633,800
-Life Sciences	633,800	633,800	633,800	633,800

Notes:

Third- and fourth-year students who are enrolled in excess of the standard completion term in a master's program are only required to pay one half of the amount stipulated in the chart.

## Tuition for Doctoral Program\*

(JPY)

1st Year		2nd Year		3rd Year	
Spring Semester	Fall Semester	Spring Semester	Fall Semester	Spring Semester	Fall Semester
250,000	250,000	250,000	250,000	250,000	250,000

\*Excluding Integrated Doctoral Program and Four-Year Doctoral Program

Notes:

1) Fourth- to sixth-year students who are enrolled in excess of the standard completion term in a doctoral program are only required to pay one half of the amount stipulated in the chart.

2) The tuition fee for those who enrolled for longer than the standard term for course completion who have fulfilled all the relevant graduate school's requirements for completion, except those relating to the doctoral dissertation, shall be 100,000 JPY per semester.

# Examples of Scholarships and Grants

## Model case for receiving Scholarships and Grants

Many students take advantage of scholarships at Ritsumeikan University. Financial burden can be reduced through such awards.

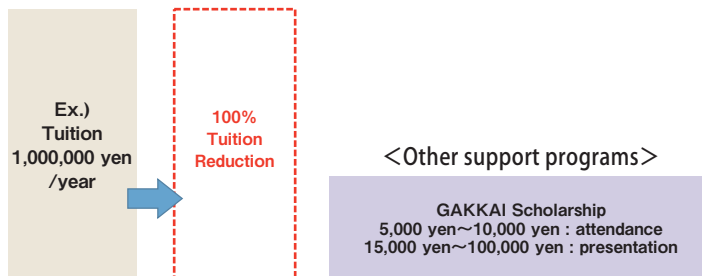

\*Please note that the details of the scholarships below are as of May 2026 and are subject to change. Please refer to pp. 10-11 for details.

### International Student Master's Program 1st Year

#### <Tuition Reduction Scholarship for International Students, Graduate Students Category I >

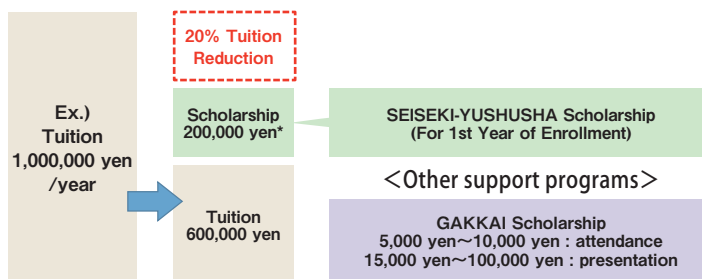

Privately financed international students with a resident status of "Student" who achieved outstanding results in the entrance examination get a 100% tuition reduction.

There are also other scholarships and grants available, such as GAKKAI Scholarship for attendance and or presentation at conferences. The GAKKAI Scholarship is limited to two disbursements per student per year.

#### <SEISEKI-YUSHUSHA Scholarship (For 1st Year of Enrollment) and Tuition Reduction Scholarship for International Students, Graduate Students Category II >

Students who achieved great results in the entrance examination are awarded a SEISEKI-YUSHUSHA Scholarship (For 1st Year of Enrollment). Also, privately financed international students with a resident status of "Student" generally get a 20% tuition reduction if they apply for it after enrollment. In the example to the right, after receiving the SEISEKI-YUSHUSHA Scholarship (for 1st year of enrollment) and 20% tuition reduction, the total tuition amount comes to 600,000 yen.

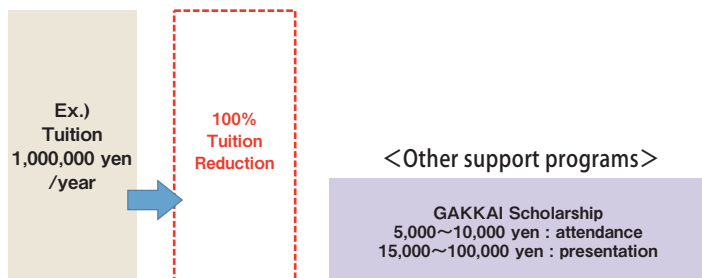

\*In case of receiving 200,000 yen.

### International Student Master's Program 2nd Year

#### <Tuition Reduction Scholarship for International Students, Graduate Students Category I >

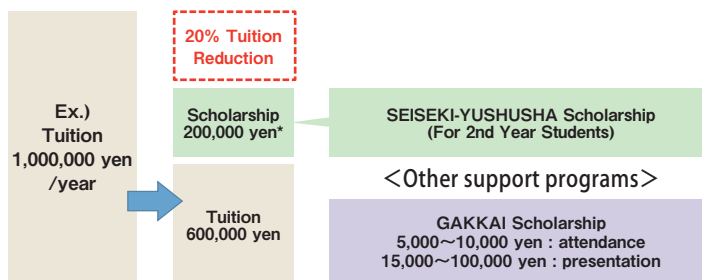

The reduction period is set as the standard program duration. Thus, Master's Program 2nd year students continue to receive benefits.

There are also other scholarships and grants available, such as the KENKYU-JISSEN-KATSUDO Grant for conducting research activities in Japan or overseas.

#### <SEISEKI-YUSHUSHA Scholarship (For 2nd Year Students) and Tuition Reduction Scholarship for International Students, Graduate Students Category II >

Students who achieved great results in their studies and research activities during their first year are awarded a SEISEKI-YUSHUSHA Scholarship (For 2nd Year Students). Also, privately financed international students with a resident status of "Student" generally get a 20% tuition reduction if they apply for it after enrollment. In the example to the right, after receiving the SEISEKI-YUSHUSHA Scholarship (for 2nd year students) and 20% tuition reduction, the total tuition amount comes to 600,000 yen.

\*In case of receiving 200,000 yen.

### International Student Doctoral Program 1st Year

#### <KENKYU-SHOREI Scholarship A >

Students who have achieved excellence in their field of research or can be expected to, are awarded a KENKYU-SHOREI Scholarship A and get an amount equivalent to the total amount of tuition.

There are also other scholarships and grants available, such as the GAKKAI Scholarship for attendance and or presentation at conferences.

# Scholarship Information

There are a number of scholarships that prospective students can secure before beginning their studies at RU, in addition to the scholarships and tuition reduction schemes that international students may apply for after commencing their studies. Scholarships are provided not only by RU, but also by organizations such as ADB and the Japanese government.

\*Please note that the details of the scholarships below are as of May 2026 and are subject to change without advanced notice. Please refer to the application guidelines of each scholarship and research grant or the website for detailed updated information.

Scholarship Type	Master's Program	Doctoral Program
Prize Fellowships for International Students (Governments, Organizations, etc)	Japanese Government (Monbukagakusho) Scholarship	
	Asian Development Bank-Japan Scholarship Program (ADB)	—
	Japan-International Monetary Fund Scholarship Program for Asia (JISPA)	—
	Monbukagakusho Honors Scholarship for Privately Financed International Students	
Fellowships for International Students (RU)	Ritsumeikan University Tuition Reduction Scholarship for International Students, Graduate Students Category I (100%)	
	Ritsumeikan University Tuition Reduction Scholarship for International Students, Graduate Students Category II (20%)	
	Ando Momofuku Scholarship for International Students	
	International Students Assistance Scholarship by Ritsumeikan faculty/staff	
Prize Fellowships	SEISEKI-YUSHUSHA Scholarship (For 1st Year of Enrollment) (Academic Excellence Scholarship for 1st Year of Enrollment)	KENKYU-SHOREI Scholarship (Prize Fellowship for Doctoral Degree Students)
	SEISEKI-YUSHUSHA Scholarship (For 2nd Year Students) (Academic Excellence Scholarship for 2nd Year Students)	RARA SPRING (RARA Student Fellow)
Support System for Career Development	GAKKAI Scholarship (Academic Conference Scholarship)	GAKKAI Scholarship (Academic Conference Scholarship)
	KENKYU-JISSEN-KATSUDO Grant (Grant for Students Participating in Study Programs)	Research Grant for Doctoral Students
	Program to Support the Submission of Academic Papers in Foreign Languages (for Graduate Students)	
	—	Grant for Publication of Doctoral Dissertation

## Apply before enrollment

Scholarship Name	Qualifications		Scholarship Conditions		Notes	Recipients in 2025
	Nationality & Age	Eligible Graduate School(s)	Benefits	Period		
Japanese Government (MEXT) Scholarship	Countries recognized by the Japanese government; Under 35	Varies year to year	145,000-148,000 yen/ month, tuition fees, travel expenses	Master's 2years Doctoral 3years	Applicants must apply to RU via special MEXT admissions	36*4
Asian Development Bank-Japan Scholarship Program(ADB)*1	Citizens of ADB developing member countries; Under 35	Economics (Master's program only)	147,000 yen / month, tuition fees, travel expenses, book allowance, medical and health insurance	2 years	Applicants must apply to RU for admission and to ADB for scholarship separately	5
Ritsumeikan University Tuition Reduction Scholarship for International Students, Graduate Students Category I (100%)	—	All graduate schools*3	100% exemption from tuition fees	Master's 2years Doctoral 3years	Awarded to Regular Admissions applicants based on entrance exam performance	29
SEISEKI-YUSHUSHA*2 Scholarship (For 1st Year of Enrollment) (Academic Excellence Scholarship for 1st Year of Enrollment)	—	(Master's programs only) All except School of Law and Graduate School of Management	100,000 - 600,000 yen deducted from tuition. (varies by graduate school)	1 year	Awarded to Regular Admissions applicants based on entrance exam performance	448

\*1 Recipients of these scholarships may not accept any additional scholarships.

\*2 Notification of award is sent to the successful applicants along with admission results.

\*3 Actual graduate schools selected each year based on university protocol.

\*4 The number of students is for the MEXT University Recommendation Scholarship only.

## Apply after enrollment (for self-financed international students)

Scholarship/ Grant Name	Eligibility Criteria	Scholarship Conditions		Application Period	Recipients in 2025
	Year Level/Age	Benefits	Period		
Ritsumeikan University Tuition Reduction Scholarship for International Students, Graduate Students Category II (20%)	All Levels	20% exemption from tuition excluding ( admission fee )	1 year	Spring / Fall	872*1
Ando Momofuku Scholarship for International Students	All Levels (Under30)	1,000,000 yen / year	1 year	Spring	4
International Students Assistance Scholarship by Ritsumeikan Faculty/Staff	All Levels	250,000 yen / year	1 year	Spring	4
Monbukagakusho Honors Scholarship for Privately Financed International Students	All Levels	48,000 yen / month	1 year	Spring	23
			6 months	Fall	24
SEISEKI-YUSHUSHA Scholarship (For 2nd Year Students) (Academic Excellence Scholarship for 2nd Year Students)	Enrolled in the 3rd semester of Master's Degree Program	100,000 - 600,000 yen (depending on graduate schools) / year	1 year	Spring or Fall One time in the 2nd year	445
KENKYU-SHOREI Scholarship (Prize Fellowship for Doctoral Degree Students)	Doctoral Degree Program	S*2: Equivalent to the yearly tuition A: Equivalent to the yearly tuition B: Equivalent to half of the yearly tuition	1 year	Spring or Fall One time (Not all of graduate schools) recruit in the fall semester.)	165

\*1 After enrollment, all students in English-based programs who meet the eligibility requirements and complete an application by the deadline are granted the award. The number of recipients listed only includes newly enrolled students. The Tuition Reduction scheme from the 2027 academic year onward is currently undecided. While changes from the current configuration are being planned, whether to enact changes or to retain the current format will be decided at a later date.

\*2 Students who have a status of JSPS Research Fellowship for Young Scientists DC1/DC2, or who passed the 1st stage screening.

Scholarship/ Grant Name	Summary of the Scholarship / Grant	Eligibility	Amount
GAKKAI Scholarship (Academic Conference Scholarship)	This scholarship assists with part of expenses for participation and presentations at academic conferences.	All Levels	5,000 yen : online attendance 10,000 yen : attendance on site 15,000 yen : online presentation / proceeding (submitted paper) is published 30,000 yen : presentation in Japan 100,000 yen : presentation overseas
Research Grant for Doctoral Students	The purpose of this grant is to reduce the financial burden for the realization of outstanding research plans by outstanding students, and to promote research activities that contribute to the completion of their doctoral dissertations as early as possible, thereby supporting the completion of their doctoral dissertations within the standard period of study.	Doctoral Degree Program	Three types: 100,000 yen/ 300,000 yen/500,000 yen
Program to Support the Submission of Academic Papers in Foreign Languages (for Graduate Students)	The purpose of this program is to encourage and prompt graduate students to internationally disseminate their research results through research article publication in English.	All Levels	up to 50,000 yen : Proofreading Expenses up to 50,000 yen : Submission Expenses
Grant for Publication of Doctoral Dissertation	This program is to encourage and prompt graduate students to publish their dissertation. This program will provide financial assistance to support those who earned a doctoral degree from Ritsumeikan University to publish their doctoral dissertation. Published books will be stored and shelved in Ritsumeikan University Libraries.	Doctoral Degree Program	Maximum of 1,000,000 yen

## Other available scholarships for international students

For more information on applying for scholarships after enrollment, see our FAQ page.

Inquires : International Center at BKC [cger-bkc@st.ritsumei.ac.jp](mailto:cger-bkc@st.ritsumei.ac.jp)

# Student Life at RU

## ■ Student Support

---

RU offers the complete range of student advisory services, including career planning, academic guidance, and services catering specifically for international students, such as assistance in obtaining visas and support for finding housing. There is also an extensive range of dining and retail options close to each of the campuses. RU is committed to providing students with the best possible opportunity to reach their full potential.

## ■ International Center

---

At the International Center, students can receive assistance with visa issues, accommodation, health, and day to day life. When new international students arrive at RU, the International Center organizes thorough orientations that include sessions outlining the procedures for registering an address at city hall, signing up for health insurance, and opening a bank account.

### A few words from the International Student Support Coordinator

"After traveling overseas to study with us, I'm sure you will encounter all sorts of fun and new experiences here in Japan. By that same token, however, it's also quite likely that you will face new difficulties and experience anxiety which you may not ever have dealt with in your home country.

Of course there is the language barrier, but beyond that there are certain to be differences in culture, customs, and even the way of thinking between Japan and your home country which will occasionally come up and cause you problems, or at least a bit of uncertainty, in your daily life. While living in a foreign country, Japan, and while studying hard at the same time, you will most likely feel stressed at one time or another. Many international students go through and overcome similar experiences before heading out into the world post-graduation. It is through these trials that international students often show such splendid development as people by the time they reach their graduation.

International Student Support Coordinators are stationed at the International Centers on each of Ritsumeikan's campuses to help international students deal with and overcome the problems and issues they face during their life studying abroad. Our support isn't limited to just big problems either - we are happy to listen and help you work through any small worries or concerns you may have. Please don't hesitate to speak with us when you visit the International Center. We look forward to talking with you!"

## ■ Peer Support

---

Outside of the regular curriculum RU provides an extensive support net for its students, stretching from "Peer Support" which is offered by fellow students, to the "Orita" (also known as "Enta") system, in which students in their 2nd year and up help incoming students get accustomed to university life. This system was first introduced by Ritsumeikan and has since gained traction at other universities here in Japan. In addition to these, the "Tutors for International Students Assembly" support program (TISA) is also maintained by the university. TISA consists of currently enrolled students who assist both newly incoming and currently enrolled international students in their daily and academic life.

## ■ Health Care

---

### ■ Health Center

Located on campus, the health center promotes the health of students through a combination of general health support services and a medical office that specializes in internal medicine. To ensure their good health, all students must take part in a yearly health check that assesses their overall health condition and, depending on the result, follows up with additional tests as necessary.

### ■ Student Support Room

Also available for students of RU is the "Student Support Room." Students are free to use this room's facilities and consult its experts when they are feeling down or are in need of expert consultation or advice. Professional counselors can assist students in English or Japanese.

## ■ Administrative Office of Each Graduate School

---

The administrative office of each graduate school provides advice on all academic matters, including on course registration and internship opportunities.

## ■ Career Center

---

The Career Center offers career support for international students looking to pursue future employment in Japan. In addition to providing career consultation, information on internships, and on-campus company information sessions, the center organizes various career development events throughout the year.

## Regional Exchange

Students at Ritsumeikan University have ample opportunity to interact with members of the local community. Community members are invited to participate in events held on campus, giving students and members of the community a chance to meet and deepen their understanding of Japanese culture and local traditions through a variety of activities. At the same time, international students have many opportunities to give presentations and share the culture and traditions of their own countries with their fellow students and the community.

## Living in Japan

Living expenses will vary depending on each student's individual lifestyle, but the following is a list of estimated expenses for an average student.

Notes	Approximate Monthly Cost
Rent	30,000 – 60,000 yen
Utilities	10,000 yen
Internet	4,000 yen
Basic Food	30,000 – 50,000 yen
National Health Insurance	2,000 yen
Mobile Phone	4,000 yen
Local Transportation	12,000 yen
Leisure Activities	25,000 yen
Total	117,000 – 167,000 yen

## Eateries

Each of RU's three main campuses houses at least one large cafeteria, with Kinugasa and BKC's cafeterias open until 8:00 pm, and OIC's cafeteria open until 7:00 pm. These cafeterias stay open late to ensure that students finishing up evening club activities or attending late lectures can relax and have a healthy meal afterwards. For students starting things off early the "100 Yen Breakfast Set" has become a popular choice. Meal plans are also available. In addition to the large main cafeterias, each campus is home to multiple smaller eateries and places to relax including Tully's Coffee at Kinugasa Campus, Starbucks at OIC, and SHIRU CAFE at BKC.

## Events on Campus

Throughout the course of the year, the International Center, student groups and even individual students organize numerous exchange events for students both on and off-campus. From visits to historical sites in Kyoto, Shiga and Osaka, to hands-on workshops in Japanese arts, crafts, and cooking, international students have plenty of opportunities to mix and mingle with their Japanese peers and to experience and enjoy Japanese culture outside of the classroom.

## Housing

RU's three main campuses each has an international dormitory, known as an I-House, located nearby.

\*There are three dormitories at Kinugasa Campus, however, graduate students are not admitted.

Monthly Lodging Fees

Room Type	BKC I-House		OIC I-House
	Type A (Single, private toilet only)	Type B (Single, private shower & toilet)	Shared (6 students/unit (private bedrooms))
Rent	44,000	51,000	55,000
Utilities (Electricity, Internet, etc.)	2,900	2,900	7,200
Bedding Rental Fee	2,000	2,000	2,000

\*Fees are current as of April 2026.

### Initial Move-in Fees

Dormitory entrance fee (equivalent to one month's rent), 1.5-2 months' rent (depending on move-in date), 2 months' bedding rental fee and utilities, administrative processing fee (10,000), and cleaning fee (10,000).

For more details: <https://en.ritsumeikai.jp/lifecareer/dorm/>

### All Campuses:

Students can find information about campus-area apartments at the Student Co-op.

BKC International House : Private Room Type A

# Language Support Programs

Ritsumeikan University offers the following language support programs to International Graduate Students.

For details, please visit our website ▶

## 1) ONLINE Academic Writing Tutorials

The ONLINE Academic Writing Tutorials provide you with the opportunity to have your written work checked by an English instructor. You can sign-up for a private (one-on-one) tutorial session in which an instructor will check your actual paper to find areas which need improvement. Students who are planning on submitting a thesis or any other form of academic paper but lack confidence in their English writing ability should take advantage of this opportunity.

<Session Schedule>

These sessions are scheduled to be offered during a designated period each semester (subject to change).

The number of sessions offered, however, differs each semester.

Please check our website below for detailed information.

[https://www.ritsumei.ac.jp/ru\\_gr/g-career/eng/language/](https://www.ritsumei.ac.jp/ru_gr/g-career/eng/language/)

<Notes>

- The instructor will NOT instruct or give professional advice on the contents of your research.
- You must bring your own paper (or select pages from your paper) on the day of the tutorial since the writing instruction will be based on your actual written work.

## 2) Japanese Conversation Program

The purpose of this program is to improve international graduate students' Japanese skills. It's mainly geared towards students enrolled in English-based programs, and is offered online.

<Course Schedule/Description>

For details, please check our website.

[https://www.ritsumei.ac.jp/ru\\_gr/g-career/eng/language/](https://www.ritsumei.ac.jp/ru_gr/g-career/eng/language/)

## ■ English Academic Writing (e-learning)

Graduate Students can attend the English academic writing program for researchers (Springer Nature's nature masterclasses). This e-learning system helps students learn how to write scientific papers and understand peer review method.

[https://en.ritsumei.ac.jp/ru\\_gr/g-career/skill/detail/?id=1](https://en.ritsumei.ac.jp/ru_gr/g-career/skill/detail/?id=1)

(See the *nature masterclasses Online Course Registration PDF* to learn how to register.)

## ■ Beyond Borders Plaza (Commons)

The Beyond Borders Plaza (BBP) is a student commons designed for student exchange, inbound and outbound study abroad support, and language learning, with one location on each of the three main RU campuses. Each BBP is composed of several different areas, including the Reading Space – a relatively quiet study area stocked with language education texts, books from overseas, comics and magazines; the Support Desk – where BBP Facilitators are available to provide advice to students; the Communication Rooms – where students can practice their communication skills by interacting with other students in an instructor-mediated environment; and the Commons Space – where international exchange events and activities are held.

The BBP provides student services such as the Communication Room language classes, help at the Support Desk, intercultural advising, events and so on. See the website for further info and check our SNS for upcoming events! !

**[BBP Website]** <https://www.ritsumei.ac.jp/bbp/>

### **PICK UP** Employment situation

In Japan, most students decide their post-graduation career path while still in college/graduate school. Job-hunting in Japan usually begins when students are in their third year of undergraduate studies or first year of their master's program.

For international students with a status of residence "Student," job hunting is only permitted up until their graduation. The best tip for successful job hunting in Japan is to develop your Japanese language proficiency as much as possible and develop a deep understanding of Japanese culture while in college/graduate school. It is common even for a foreign-affiliated company in Japan to require you to have a high Japanese language level since their customers are mainly Japanese.

We encourage you to discover your future career path during your college life and utilize all the support provided by the Career Center. The Ritsumeikan University Career Center provides career support services, especially for international students seeking employment in Japan.

#### ✓ Career center provides a wide range of support for job-hunting for international students

- Individual career consultation (English and Japanese)
- Company information session (English and Japanese)
- Entry sheet (Resume) writing workshop (Japanese)

#### ✓ Examples of Past Employers of International Student Alumni

Liberal arts Humanities	Accenture Japan Ltd., Fujitsu Limited, Hitachi, Ltd., IBM Japan, Ltd., MUFG Bank, Ltd., Nitori Holdings Co., Ltd., Panasonic Holdings Corporation, Rakuten Group, Inc., SoftBank Corp., etc.
STEM	Amazon Japan G.K., Daikin Industries, Ltd., Hitachi, Ltd., IBM Japan, Ltd., KONICA MINOLTA, INC., Kubota Corporation, Nissan Motor Co., Ltd., NTT DOCOMO, INC., SEGA CORPORATION, Sharp Corporation, etc.

\*The above includes employers who have hired undergraduate students.

# Graduate School of International Relations (GSIR)

Global International Relations Program / International Relations Program (Master's Program)

## ■ Outline

We are living in a connected world which faces a growing number of global issues; these are issues that no single state can cope with alone. The global pandemic, climate change, refugees and migration, terrorism, and natural disasters are all global issues that require dialogue and close cooperation between various national and international actors. Our Master of International Relations degree is designed to train future leaders who are equipped with the skills and expertise to address pressing global challenges which cut across politics, economic development, culture, and society.

## ■ Features

- We offer a unique interdisciplinary program that links politics, economics, media, and culture with a global perspective.
- We embrace a diverse group of students from over 30 countries.
- We are located in Kyoto, within cycling distance of various UNESCO World Heritage Sites and Kitano Tenmangu Shrine which enshrines the god of academics.

## ■ Program

### Courses offered in Japanese / Courses offered in English

#### International Relations Program (Japanese-Based Program)

Global Governance Cluster

Sustainable Development Cluster

Culture, Society and Media Cluster

#### Global International Relations Program (English-Based Program)

Global Governance Cluster

Sustainable Development Cluster

Culture, Society and Media Cluster

Global Japanese Studies Cluster

The GSIR's Master of Arts in International Relations program is designed to offer two programs, in Japanese and English.

\* Admitted students are affiliated only with their program and not with any particular cluster.

\* Students may take courses from any cluster.

\* Not all courses are offered every year. Please confirm the exact information at the orientation after enrollment.

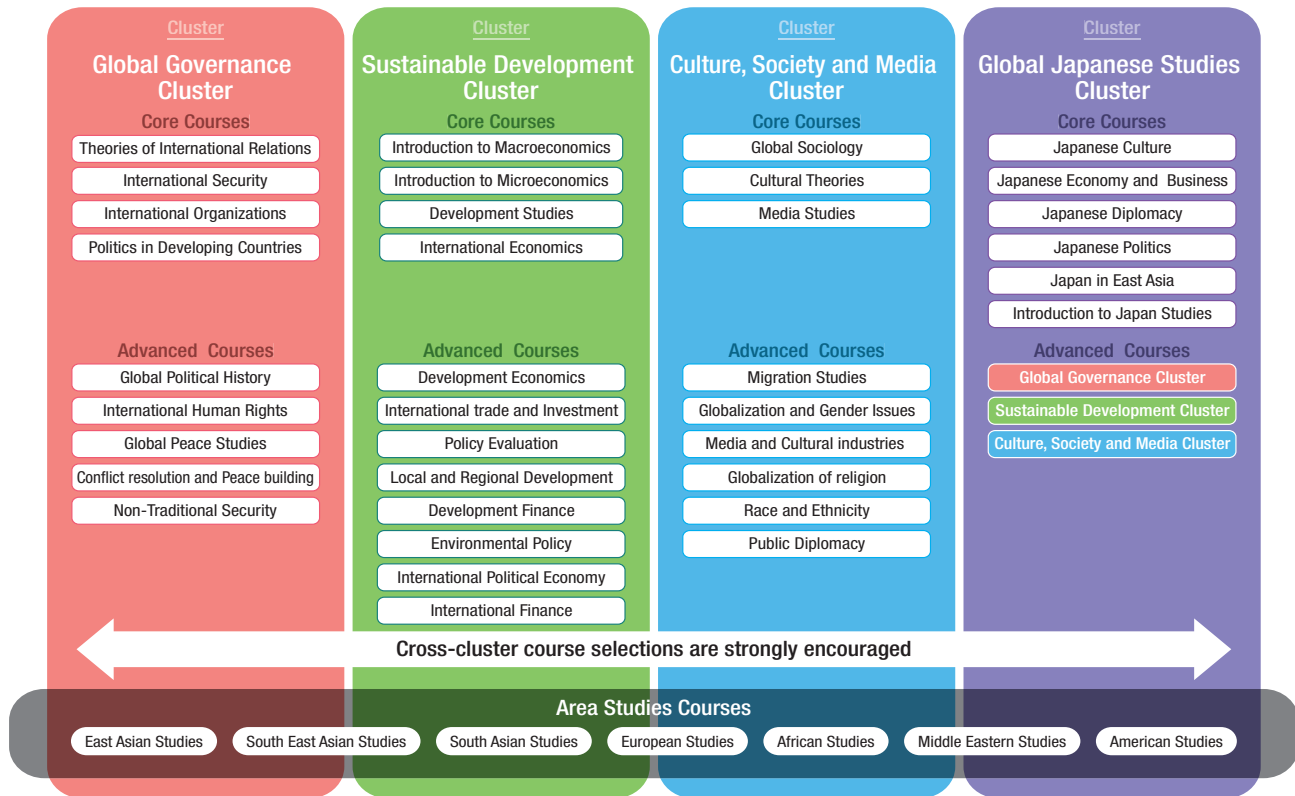

## ■ Support for individual Research (Master's Thesis)

Students receive comments and feedback from professors at regular presentations prior to the submission of their master's thesis. Student questionnaires show a high degree of satisfaction with our guidance.

## Curriculum

\*Please see our website for more details.

YANE, Haruka	International Economics, International Trade and Labor, Economic Policies

# Graduate School of Economics

Master's Program in Economic Development (MPED) / Doctoral Program

Nurturing knowledge professionals with a base in economics

## ■ Outline

Since its establishment in 1950, the Graduate School of Economics has produced many outstanding graduates who have entered the business world, central and local governments, and various research organizations. Located near Lake Biwa, the largest lake in Japan, the campus offers a beautiful natural environment along with the highest level of facilities and equipment. The faculty of Economic has nurtured as much as 50,000 students with independence and ability in business. We feel proud that we kept a prominent position among a lot of graduate schools and faculties of economics in Japan in terms of quality of education and research.

## ■ Features of Program

### Master's Program

The school has offered the program for international students in English since 2001. These have proved popular with international students who enjoy taking courses in English in a Japanese academic environment, while working with their academic advisors on the writing and submission of their theses. The Master's Program in Economic Development (MPED) starting from September 2002 is a course in fundamental economic theory such as Microeconomics, Macroeconomics and Econometrics and applied economics, conforming to international standards and taught entirely in English. This course accepts students with strong interest in Japan and the Asian regional development from developing and developed countries, and will foster researchers - who have acquired specialized knowledge along with a strong sense of reality - and highly specialized professionals who can lead the international community. The aim of this program is to nurture talented individuals with wide-ranging discernment who can become leading figures in international society (in whichever field).

### Doctoral Program

In the Doctoral Program, which was established in 1964, researchers acquire a broad perspective, higher specialization in knowledge and skills, and a superior capacity to independently pioneer new spheres of research. As a result, this program has produced a large number of talented individuals who are working for a wide range of universities and research institutions.

## Program Structure

### Master's Program in Economic Development

#### Degree Requirements

- Students must acquire 30 credits in the two years, including:
- 4 credits from Core courses.
  - 4 credits from Elementary Seminars I and II in the first year.
  - 4 credits from Special Seminars I and II in the second year. (Special Seminar is the individual thesis instruction by supervisor.)

#### Type of Courses

		First Year	Second Year
Course Work	Core Courses	Microeconomics I Microeconomics II Macroeconomics I Macroeconomics II Econometrics I Econometrics II	
	Elective Courses	Development Economics International Economics International Finance Financial Economics Topics in Economics Political Economy Infrastructure Development Policy Frontiers of International Project Development	Japanese Economy Public Policy Environmental Economics Internship Program Applied Economics International Political Economy International Political Economy Research Seminar I Research Seminar II
Thesis; Elementary Seminars Special Seminars Research Seminars		Elementary Seminar I Elementary Seminar II	Special Seminar I Special Seminar II Research Seminar I Research Seminar II
Learning in Practice		Open Seminar, Workshop, Fieldwork, Study Tour	

#### Program Schedule

First Academic Year	
September February – March April	Entrance Ceremony, Fall Semester Begins Spring Break / Winter Intensive Course Submission of Research Plan
April June August – September	Spring Semester Begins / Health Examination Announcement of Supervisor and Sub-supervisor Summer Break / Summer Intensive Course
Second Academic Year	
September January January February – March	Fall Semester Begins Interim Presentation Submission of Special Seminar Report Spring Break / Winter Intensive Course
April July July August August – September September	Spring Semester Begins / Health Examination Final Presentation Submission of Master's Thesis Oral Examination of Master's Thesis Summer Break Commencement Ceremony

#### Doctoral Program

#### Degree Requirements

- Enroll for more than 3 years.
- Earn 12 credits or more including Research Seminar I ~ IV.
- Submit a doctoral dissertation. Submitted dissertation must pass the Dissertation Review by Graduate School of Economics.

## Alumni's Voices

**YUDHISTIRA Nurpatría**  
(Indonesia)

I believe that studying in the MPED program at Ritsumeikan University is very beneficial for my future. Guided by world-class professors, I gain valuable knowledge in empirical research and economic theory, which is useful for my career as a policymaker. Outside of university life, I am also blessed with other invaluable opportunities to exchange cultures with Japanese people and to study Japan's governance in daily life.

**OSTONOV Murodjon**  
(Uzbekistan)

My experience in the MPED program at Ritsumeikan was truly transformative. The combination of a well-designed curriculum, inspiring professors, practical field trips, and immersion in Japanese culture and society offered much more than a degree. The program not only strengthened my skills and career readiness but also gave me lasting friendships and perspectives that will guide me into the future.

**NGUYEN Phuong Linh**  
(Vietnam)

I first arrived in Japan in 2022 and started my new student life as a MEXT-scholarship student. For me, studying at Ritsumeikan University for MPED was the best decision I have ever made. Ritsumeikan supports and nurtures me, increasing my knowledge about economics. I also had opportunities to experience Japanese culture such as the field trip to Fuji, Toyota Museum, or cherry blossom picnic, Gion festival, with our professor and classmates. I have had many unforgettable memories here.

# Graduate School of Science and Engineering

International Program for Science and Engineering (Master's and Doctoral Program)

Powering the Future -The Structure of the Future-

## ■ Outline

To train researchers and professionals to possess not only a high level of theory and skills in the specialized fields of science and engineering, but also the ability to make creative discoveries.

The society of the 21st century becomes more diverse and complex, expecting towards graduate education in science and engineering to be greater than ever before. Furthermore, we now must think about technology in terms of its potential contributions to a sustainable global society. In order to meet these requirements, we offer diverse programs: Advanced Mathematics and Physics, Advanced Electrical, Electronic and Computer Systems, Advanced Mechanical Engineering and Robotics, and Advanced Architectural, Environmental and Civil Engineering. Our graduate school is staffed with professors who are capable of fulfilling our educational philosophy, and well-equipped with facilities such as laboratories that satisfy all essential requirements for advancing education and research.

## ■ Completion Requirements

### Master's Degree Program < Standard Period of Study: 2 years >

Students must gain 30 credits and hand in a Master's thesis.

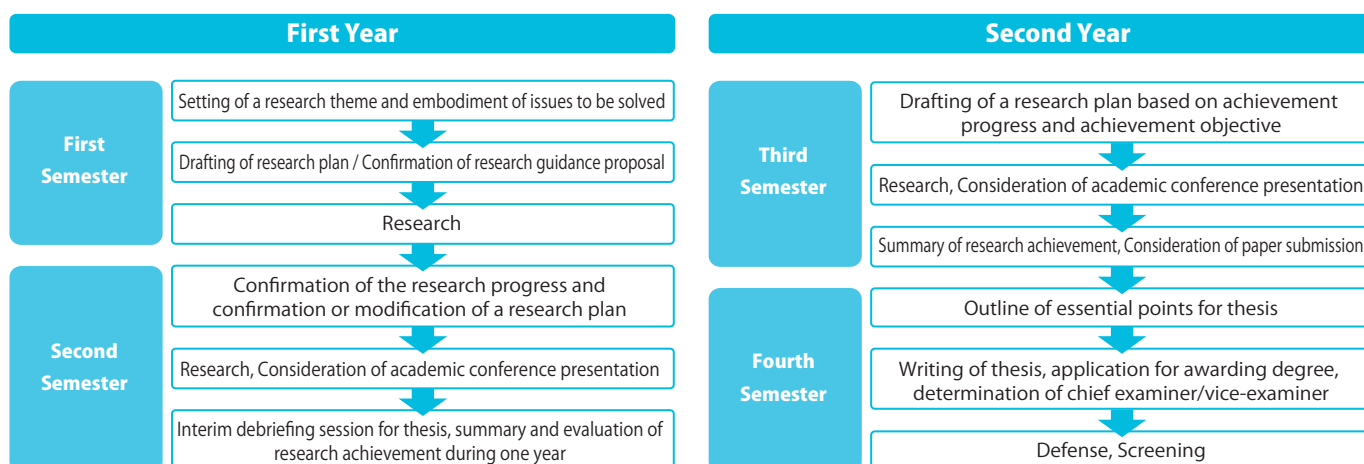

- Not less than 4 credits from Common Subjects must be acquired
- Not less than 10 credits from Major Subjects must be acquired
- 16 credits from Research Subjects must be acquired

### Doctoral Degree Program < Standard Period of Study: 3 years >

Students must gain 8 credits and hand in a Doctoral dissertation.

- 8 credits from Research Subjects must be acquired

## ■ A Model of Research Flowchart in Master's Degree Program

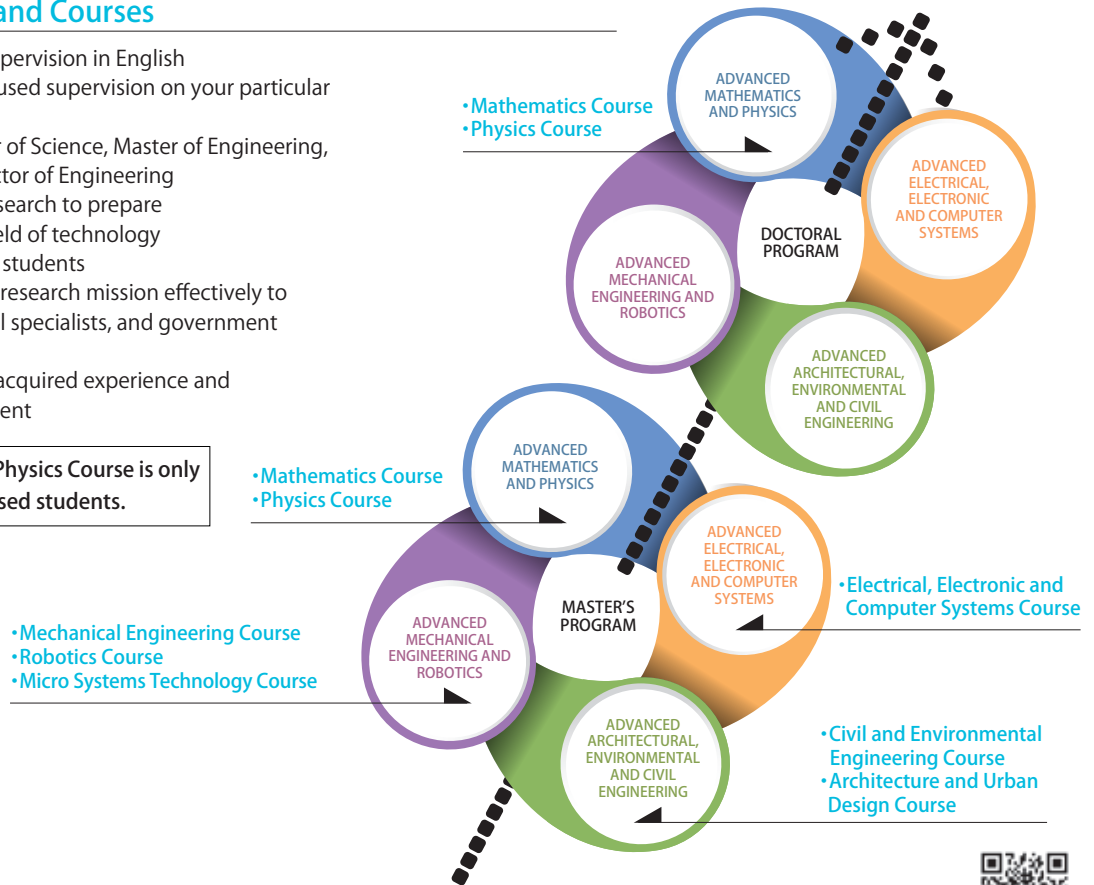

## Program Features and Courses

- All courses and research supervision in English
- Opportunity to receive focused supervision on your particular field of interest
- 4 degrees available: Master of Science, Master of Engineering, Doctor of Science, and Doctor of Engineering
- Practical result-oriented research to prepare you to excel in a leading field of technology
- Multinational faculties and students
- Learn how to express your research mission effectively to technical experts, industrial specialists, and government representatives
- Learn how to make use of acquired experience and skills to regional development

※ At the Master's level, the Physics Course is only available for Japanese-based students.

## Past Research Topics

### Advanced Mathematics and Physics

#### Mathematics Course

- Chern-Simons theory and its applications
- Applications of Stochastic Calculus based on Hyperbolic Brownian Motion
- Numerical analysis for stochastic differential equations with irregular coefficients

#### Physics Course

- Indirect signature of Kaluza-Klein dark matter
- Electronic States of the First Order Ferrimagnet ErCo<sub>2</sub> Studied by Polarization Dependent Hard X-Ray Photoemission Spectroscopy
- One Loop Analyses of Superstring Vacua on Asymmetric Orbifolds

### Advanced Electrical, Electronic and Computer Systems

- Efficient thermal analysis algorithm for Lithium ion battery modules
- Transient stability analysis of a multimachine power system using Lyapunov's second method
- Advanced Positioning Algorithms for Automotive Single Frequency Receivers Based on PPP/VPPP GR Models

### Advanced Mechanical Engineering and Robotics

#### Mechanical Engineering Course

- Investigation of Power Electricity of Small Propeller in Waste-water Pipe
- Design and Parametric Study of Micro Compressor for Micro Gas Turbine using Computational Fluid Dynamics
- Study on Deformation Behavior of Heterogeneous Structure Materials via Multi-Scale FEM Analysis

#### Robotics Course

- Design of an Under-Actuated Adaptive Prosthetic Finger
- Variable Configuration Stereo Using Two Unmanned Aerial Vehicles
- Mechanical Design and Control of Inflatable Robotic Arm

### Advanced Architectural, Environmental and Civil Engineering

#### Civil and Environmental Engineering Course

- Study on Paste Dripping of Porous Concrete and New Evaluation Method for Fresh Porous Concrete
- Evaluation of Rebar Corrosion in RC using Acoustic Emission and Half-Cell Potential under Electrical Corrosion Test
- Effectiveness of Bike to School Policy for Junior High School Students in Blitar Municipality, East Java Province, Indonesia
- Exploring the Potential of 3D Printing for Building Houses in Nigeria and Brief Numerical Analysis of Lintels in 3D Printed Houses
- Assessment of Secondary Lead Reserves and Potential Lead Waste of Nations
- Exploring and Comparing the Quality of Public Transportation Services from Social Media: Case Study of Greater Jakarta

#### Architecture and Urban Design Course

- Development of a Sustainability Assessment Tool for Cities in Indonesia using the Analytic Hierarchy Process Method
- Architectural Heritage Preservation as a Tool for Sustaining the Architectural Identity
- Electrical Resistivity Measurement Based of Compressive Strength Control for High Fluidized Soil Improvement Construction

Researcher Database

# Graduate School of Life Sciences (GSLs)

International Program for Life Sciences (Master's and Doctoral Program)

Cultivating human resources that can contribute to solve the challenges of all humankind in the 21st century

## ■ Outline

The Graduate School of Life Sciences focuses on integrated and collaborative education in the life sciences where students can proactively study related fields while simultaneously deepening their understanding of their specialized area of study. We educate students and conduct research in the hope of cultivating individuals with a depth and breadth of knowledge who manifest independence and initiative.

International students are accepted for all courses, which are taught in English.

The program is designed to foster the acquisition of broad knowledge and specialized skills related to the life sciences.

## ■ Research Topics of Faculty

### Applied Chemistry Course

- Synthesis and Physical Properties of Novel Organic Functional Materials
- Understanding the Functional Principles of Metal Catalysts and Developing Next-Generation Materials
- Developments of Novel High-Performance Photofunctional Materials Based on Physical Chemistry
- Design and Construction of Chemical Reaction Spaces Using Biomolecules
- Fabrication of Electronically and Electrooptically Functional Materials Through Synthesis and Assembly of Unexplored Molecules
- Elucidating the Molecular Dynamics of Photochemical Reactions and the Primary Processes of Photosynthesis Using Ultrafast Spectroscopy
- Development of Next Generation Rechargeable Battery Based on Solid Electrochemistry
- Redox Biochemistry
- Creating Future Polymer Materials by State-of-the-Art Nanotechnology
- Design of New Metal Complexes and Their Application to Transformation of Inert Molecules
- Creating Bioactive Molecules Using Catalytic and Enzymatic Transformations
- Molecular Mechanisms of Structure Formation and Conformational Change of Biomacromolecules

### Biotechnology Course

- Functional Analysis of Plant Carbohydrate-Active Enzymes and Carbohydrate Compounds
- cAMP Signaling System in Plants
- Structural Bioscience for Improvement of Nature Environment and Drug Design
- Clarification of Biological Roles of Glycans by Synthetic Molecular Probes
- Development of the Production System of Valuable Materials Using Enzymes and Fermentation
- Generation of Virus- and Viroid-Resistant Plants through Genome Editing
- Mechanism of Bacterial Metabolic Pathways
- Elucidating the Principles and Functions of Archaeal Genome Organization

### Bioinformatics Course

- Analyze Tissue and Organ Function Based on the Accurate Cell Level Model
- Molecular Mechanisms of Environmental Stresses Tolerance in Plants
- Understanding from Genome to Life System
- Elucidation and Application of Structure-Function Relationship of Bio-molecules
- How Photosynthetic Microorganisms Respond to Changes in Their Environment?
- Rhythms in Motion and Rhythms in Brain: Deciphering Neural Information Processing from Rhythm
- Mathematical Models for Understanding Life as Information Processing Machinery

### Biomedical Sciences Course

- Development of Innovative Therapy Targeting Immunosuppressive Cells
- Proteomic Study on the Diseases
- Dissecting the Process of Somatic Cell Reprogramming and Stem Cell Differentiation and Its Application to Regenerative Medicine
- Study for Pathologic Elucidation and Treatment of Diabetes
- Remodeling of Neural Network Underlies Vigorous Adaptability of the Brain
- Roles of Protein Modifications in Biological Phenomena and Disease Onsets
- Assessing the Value of Health Technologies and Supporting Policy Decision Making

Researcher Database

## Program and Courses

### MASTER Major in Advanced Life Sciences

#### Applied Chemistry Course

Studying both theory and technology in chemistry at the molecular level, and exploring new materials, new energy sources, and new biomaterials.

- [Keywords]**
- New materials
  - Nanotechnology
  - Environmental analysis
  - Energy conversion
  - Functional materials

#### Biotechnology Course

Studying both theory and technology in biology at the molecular level, and exploring new frontiers in environmental technology, food technology, bio-resources, and energy technology.

- [Keywords]**
- Microorganisms
  - Bio-energy
  - Molecular biology
  - Environmental purification
  - Biological resources
  - Plant

#### Bioinformatics Course

Studying both fundamentals of life science and information science, and exploring new frontiers in life sciences by combining those two perspectives at the molecular level.

- [Keywords]**
- System biology
  - Genome analysis
  - Information science
  - Bioinformatics

#### Biomedical Sciences Course

Studying both the forefront of medical sciences and their fusion fields, and exploring new frontiers in life sciences, medical science and medical policy.

- [Keywords]**
- Genome medical chemistry
  - Tailor-made medicine
  - Gene therapy
  - Preventive health medicine

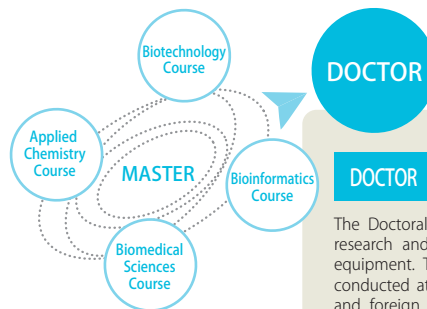

## Completion Requirements

### Master's Program

Category	Credits Required		Total
Common Subjects	Not less than 4 credits		Not less than 30 credits
Major Subjects	Core Subjects	Not less than 6 credits	
	Electives	Not less than 10 credits	
Research Subjects	16 credits		

### Doctoral Program

Category	Credits Required	Total
Major Subjects	-	Not less than 8 credits
Research Subjects	Not less than 8 credits	

### DOCTOR Major in Advanced Life Sciences

The Doctoral program engages in graduate-level education and research and makes use of highly specialized laboratories and equipment. There are also myriad cooperative research projects conducted at the international and regional levels with domestic and foreign companies and other graduate schools within the university.

## Student Voice

### China

LI Ludi

Level of Study: Master's Program  
Course: Biotechnology Course

**Q** Were you worried about your new life at Ritsumeikan University before your arrival? If so, how did your worries change after arriving?

**A** Before coming to Ritsumeikan, I was worried about whether I could adapt to a different education system, especially since I did my undergraduate studies in Italy. I was also unsure about my Japanese level and whether I could make new friends. However, after arriving, I found the professors and classmates to be very friendly and helpful. I was able to make friends with students from various countries and gradually adapted to the academic environment. The transition turned out to be much smoother than I expected.

### Thailand

WACHIRAPONGPORN Satakan

Level of Study: Master's Program  
Course: Biotechnology Course

**Q** How do you think your experience at Ritsumeikan University will help you achieve your goals?

**A** My experience at Ritsumeikan University is helping me build the skills and mindset I need to achieve my long-term goals. Academically, I've gained a solid foundation in my field of study, along with valuable research experience that will help me pursue graduate studies or a career in science. More importantly, I've learned how to think critically, communicate effectively across cultures, and solve problems in diverse teams. These are essential skills in today's global job market. Living and studying in Japan has also made me more independent, adaptable, and open-minded—qualities that I believe are just as important as technical knowledge. Whether I continue my career in Japan or in another country, I know that what I've learned at Ritsumeikan both inside and outside the classroom will serve as a strong foundation for whatever I choose to do next.

### America

LAW King Chuen

Level of Study: Doctoral Program  
Course: Bioinformatics Course

**Q** Why did you choose to study at Ritsumeikan University?

**A** Ritsumeikan University is a prestigious private university that offers world class education and research facilities. Professors of Ritsumeikan University are experts in their respective fields and willing to share their extensive knowledge with young scientists in order to advance scientific research. I chose Ritsumeikan University because it offers an exceptional and positive learning environment where I can benefit from the expertise and guidance of my professors and foster my own personal and academic growth.

### India

SAHU Abhilash

Level of Study: Doctoral Program  
Course: Advanced Life Sciences

**Q** What is your favorite thing about Ritsumeikan University?

**A** My favorite aspect of Ritsumeikan University is the warm and inclusive environment that it creates for students from all backgrounds. The vibrant community, supportive faculty, and modern research facilities make it an excellent place to learn and grow. I particularly value how approachable the staff and professors are, always ready to guide students and make them feel comfortable. Even as an international student, I never feel isolated because the university offers language classes, career support, and various resources that make daily life and academic activities much easier.

# Graduate School of Pharmacy

International Program for Pharmaceutical Sciences (Doctoral Program)

Drug developing researchers who can use their expertise in a wide range of fields

## ■ Outline

The Graduate School of Pharmacy aims to cultivate talented individuals who possess a high level of specialized knowledge and research skills in pharmaceutical science, together with a strong sense of mission and high ethical standards, and who can contribute to the community and society.

The Doctoral Program in Pharmaceutical Sciences aims to produce talented individuals who can contribute to educational institutions, research institutions, companies, and public health agencies with an advanced knowledge of pharmaceutical sciences and excellent research skills.

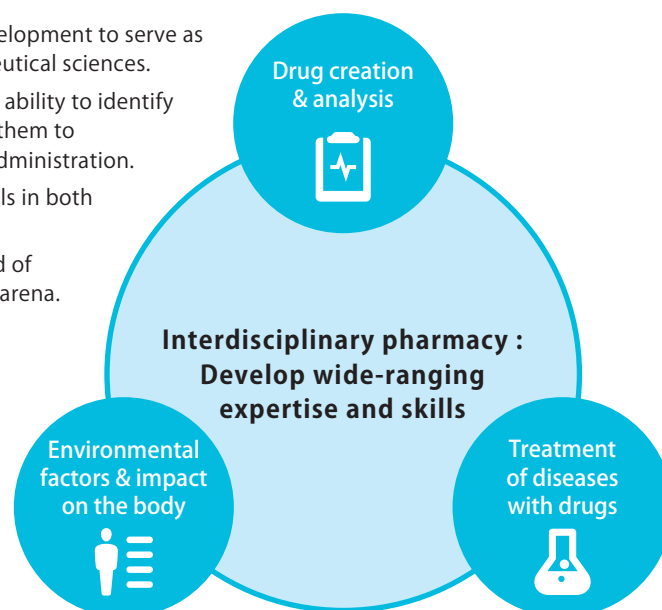

## ■ Diploma Policy

In the Doctoral Program in Pharmaceutical Sciences, students will be awarded the degree of Doctor of Pharmaceutical Sciences if they are recognized as having achieved the following four educational objectives after acquiring the prescribed credits and passing their doctoral dissertation screening.

### Educational Objectives

By the time of program completion, students will:

- ① Possess an advanced expertise in pharmacy centered on drug development to serve as the advanced knowledge for the fields of pharmacy and pharmaceutical sciences.
- ② Possess a highly developed ethical outlook as well as an advanced ability to identify and solve problems and the logical thinking skills that will enable them to contribute to drug research and development and public health administration.
- ③ Possess an advanced logical writing and research presentation skills in both Japanese and a foreign language.
- ④ Be able to communicate in English using their expertise in the field of pharmaceutical sciences in order to pursue activities in the global arena.

### Doctoral Dissertation Evaluation Standards

- 1 Is the research topic academically appropriate for the Doctoral Program in Pharmaceutical Sciences?
- 2 Does the research possess originality and creativity?
- 3 Have prior studies been appropriately considered?
- 4 Are the research methods correctly described?
- 5 Are the results of experiments, the investigation of facts, and the literature correctly described, and have the details of the research been fully considered?
- 6 Does the research comply with laws and regulations, and is it grounded in research ethics?

### Curriculum Policy

Based on the program’s educational objectives, the Curriculum Policy is as follows: The curriculum consists of two subject categories, Research Subjects and Lecture Subjects, and students who systematically pursue their studies in these subjects shall achieve the educational objectives.

#### Curriculum Table

Doctoral Program (Ph.D.)Major in Pharmaceutical Sciences

##### 1. Curriculum Overview

Category	Course Title	Year	Semester	Requirement	Credits	Remarks
Specialized Subjects	English Research Presentation Seminar	1	Spring	Elective	2	Not counted toward the credits required for completion
	Special Research I	1	Spring	Required	2	
Research Course	Special Research II	1	Fall	Required	2	
	Special Research III	2	Spring	Required	2	
	Special Research IV	2	Fall	Required	2	
	Special Research V	3	Spring	Required	2	
	Special Research VI	3	Fall	Required	2	

### Research equipment

The Science Core, which serves as the main building for the College of Pharmaceutical Sciences and the Graduate School of Pharmacy, is fully equipped to enable rewarding research. It includes thesis research rooms, shared facilities (e.g., low temperature room, darkroom, common equipment room), animal laboratory, student laboratory, simulated clinical laboratory (mock pharmacy, mock hospital room), and seminar rooms, and a medicinal plant garden is located next door. Some College of Pharmaceutical Sciences equipment is also located in other facilities (e.g., Biolink and Co-learning House 2), and the chemistry, biology, and medical/clinical labs are all fully equipped.

# Graduate School of Policy Science

Master's Program / Doctoral Program

Building the ability to implement policies through direct interaction with society

## ■ Outline

Policy science is a new discipline that involves interdisciplinary and practical studies.

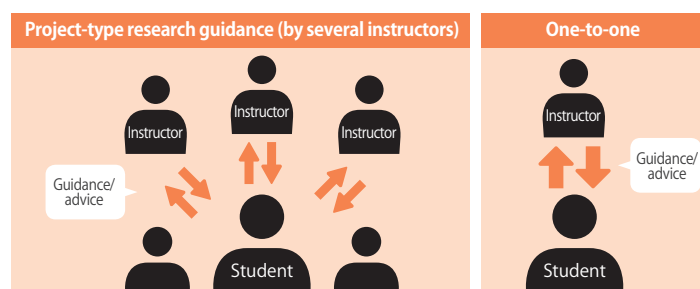

The curriculum of Graduate School of Policy Science (GPS) is characterized by its "Research Project" program, which aims to open up intellectual spaces where faculty members of different specialties work with graduate students each of whom pursues different research themes. There, they are guided by their respective motivations to explore policy design to find solutions to policy issues that have taken place in real society, by constantly alternating between practical and basic theoretical approaches.

## ■ "Research Project" and the Three Clusters, Characteristics of Policy Science

### Project-type research guidance to deal with policy issues

What is unique in our graduate school is "project-type" research guidance in which instructors from different expertise organize joint research teams and students participate in the joint research process within the group. The purpose of this Research Project is not just giving research guidance from one academic supervisor for one specific area, but rather several instructors who differ in their specialties with common interests in the area / theme of study collectively directing the students.

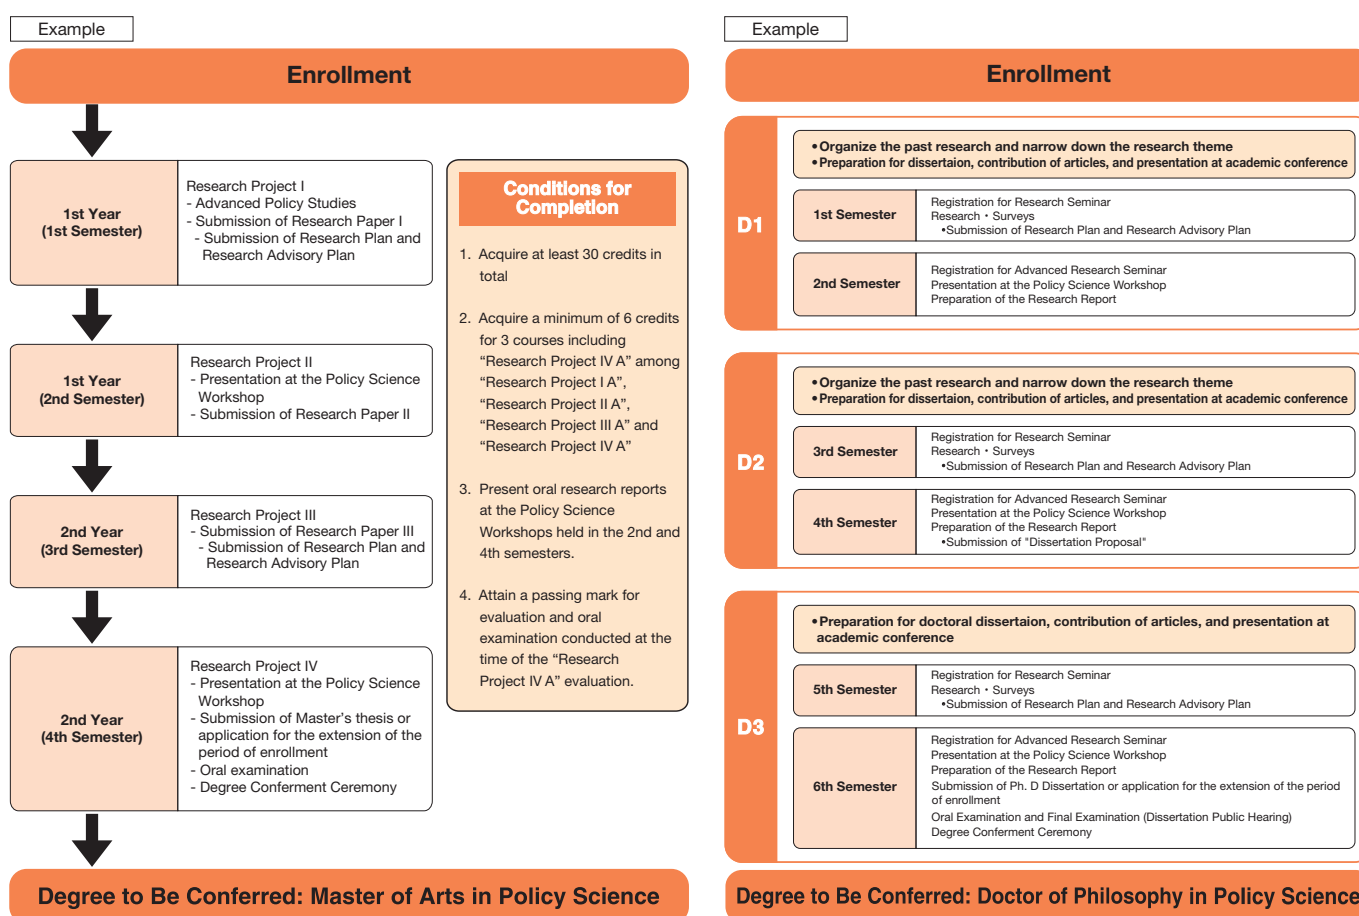

Research guidance at the Graduate School of Policy Science

General guidance

## Course Titles

- Policy Case Reading I (Studies in Culture and Public Policy)
- Policy Case Reading I (Environmental Policy Analysis)
- Policy Case Reading I (Local Governance)
- Policy Case Reading I (Japan Studies)
- Introduction to Public Policy
- Introduction to Social Management
- Introduction to Sustainable Development
- Policy Case Reading II (Planning Science and Technology)
- Policy Case Reading II (Social Welfare Policy)
- Policy Case Reading II (Statistical Analysis for Policy Studies)
- Policy Case Reading II (Japan Studies)
- Policy Case Writing I
- Policy Case Writing II
- Participatory Case Research Analysis
- Social Survey Data Archive Analysis
- Policy Science Special Lecture (Technology Management I-II)
- Advanced Policy Studies
- Research Project I
- Research Project II
- Research Project III
- Research Project IV
- Regional Co-creation Study

# Graduate School of Information Science and Engineering (GSISE)

Promoting Education and Research in Cutting Edge IT

## ■ Outline

International students can enroll in either Japanese or English-based curriculum of instruction. This program is designed to support engineers capable of actively participating in global-level careers.

## ■ Key features of GSISE

### ■ Professors Covering Various Fields

There are over 100 professors in our graduate school and our graduate school is one of the biggest graduate schools in IT field in Japan. Our professors cover a lot of research fields and have various research themes. Students can study under all of our professors in English. Our professors are also active in their research activities and obtain budgets from Japanese government for their unique research which its results boast to the world. That makes students study based on the latest research achievements.

### ■ Countries of International Students

China, Vietnam, Thailand, Indonesia, Korea, Myanmar, Saudi Arabia, Mexico, Malaysia, USA, Cote d'Ivoire, Pakistan, Hungary, Bangladesh, Morocco, Rwanda, Russia, Uzbekistan, South Africa, Philippines, India, Mongolia, Ukraine, Uganda, Egypt, Sweden, Brazil, Mexico

MASTER

## Advanced Information Science and Engineering Major

The Master's Program aims at fostering researchers and specialists who are ready to tackle and solve issues pertaining to today's information society at the local and global levels. Students will gain competencies in analyzing and solving problems, communicative proficiency in Japanese and in English, understanding of developments in theories and cutting-edge technologies in information processing, network construction and system architecture, media technology, technologies applied to human life and intelligence, and ethics in science and technology.

DOCTOR

## Advanced Information Science and Engineering Major

The Doctoral Program fosters researchers and specialists who can function at the forefront of various domains in order to solve, with creative and innovative approaches, important and critical issues of society. Acquired in the program are understanding of theoretical and technological advances in information technology, knowledge and attitudes in research ethics, creativity in identifying, analyzing, and solve problems, and skills in pursuing research activities and those in effective communication.

## Curriculum

Researcher Database

### Subjects in Master's Program

(extracted subjects from Special Major Subjects are shown below)

- Advanced Topics in Global Software Engineering
- Advanced Topics in Software Engineering
- Advanced Topics in Communication Science
- Advanced Topics in Human Factors for Systems Engineering
- Advanced Topics in Computational Intelligence in Games
- Advanced Topics in Image Processing
- Advanced Topics in Knowledge - based Systems
- Research for Master in Information Science and Engineering 1 ~ 4

### Subjects in Doctoral Program

(Special Research Subjects)

Research for Doctor in Information Science and Engineering 1 ~ 6

## State-of-the-art Research Environment

Graduate School of Information Science and Engineering conducts significant research activities supported by Grants-in-Aid for Scientific Research, joint research with private companies and other governmental funds. Therefore, we provide students the state-of-the-art facilities and equipment and education based on the latest research activities.

### Grants-in-Aid for Scientific Research (KAKENHI) 2024

# Graduate School of Technology Management

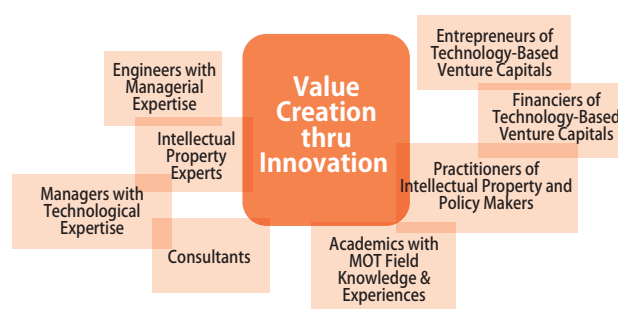

Master's program in Japanese / Doctoral program

Realizing new potential by bridging business with Technology

## Outline

The Graduate School of Technology Management focuses on how firms can effectively capitalize on technology. Research in this field spans a broad range of industries, including automobiles, electronics, telecommunications, energy, utilities, and beyond. As an academic discipline, the school surpasses the technical side of improving management efficiency. In addition to core areas such as research and development, operations management, corporate organization, and finance, our curriculum integrates strategic management of technology, technology marketing, and innovation strategy. The school offers Master's programs conducted only in Japanese and Doctoral programs available in both Japanese and English, supporting the development of globally oriented careers.

## Program Overview and Features

	Master's Program	Doctoral Program
<b>Degree</b>	Master of Technology Management	Doctor of Philosophy in Technology Management
<b>Language of Instruction</b>	Japanese	English and Japanese
<b>Enrollment Semester</b>	April and September	April and September
<b>Duration</b>	2 Years	3 Years
<b>Enrollment Capacity</b>	70 Students	5 Students

In 2025, the school introduced a new curriculum to develop future leaders. Along with technology management, the program offers "Futurepreneurship" courses to help students design and lead the future, strengthen management skills for science students, and we will provide flexible online learning for working students.

Researcher Database

## Research Field of MOT

### Technology and Management Strategy

Understand frameworks for sustaining and developing a company through innovation, as well as strategies for guiding research and development to commercialization and industrialization.

### Marketing and Roadmapping

Learn methodologies for forecasting and predicting future trends in society, markets, services, products, and technology development, and incorporating them into corporate strategy planning.

### Business Creation and Entrepreneurship

Acquire comprehensive knowledge essential for creating new businesses, exploring new fields, and achieving entrepreneurial success is covered.

### Intellectual Property

Learn how to protect and leverage creative value and brands as intellectual property. It also covers the strategic acquisition and global challenges of intellectual property.

### Operations Management

Learn technology development, product and service development, procurement and manufacturing, and supply chain management necessary for the stable supply of high-quality products and services to the market.

### Finance, Financial Accounting, and Risk Management

Acquire fundamental knowledge of financial accounting for sustainable business management, along with basic finance theories to enhance corporate value, and develop systematic capabilities in corporate risk management.

### ICT Strategy and Services

Learn business innovation through the strategic planning, technology development, product development, manufacturing, and supply chain integration of ICT, including artificial intelligence, big data, IoT.

### Human Resource Management

Learn development of talent for driving innovation and strategies for leveraging such talent within organizations. It focuses on leadership skills required for managing research and development teams.

### Decision-Making and Negotiation

Understand the frameworks and roles of situational analysis and negotiation in areas such as corporate competitive strategy, research and development.

### Social Systems and Design

Learn social fields and various fields necessary for designing and viewing social systems from a broad perspective.

## Research Field of MOT

- Crowdsourcing for Business Ideas through Reddit: Exploring the Dynamics of Online Innovation
- A Study on Chinese Patients' Decision-Making in Online Health Communities
- A Study on Social Application in the Development of Mobile Health
- A Study on Chinese Short-Video Using Social Media Advertising Model
- An empirical study of the factors affecting customer satisfaction and intention to use food delivery apps before and during the COVID-19 in Thailand
- The Role of Innovation Policy and Science Communication in Accepting New Food Technology
- A Study of Nonaka's Wise Leader Practices and an Image of Leadership from the Perspective of Subordinates, to Promote Management Innovation Performance via Stimulating Employee's Knowledge Sharing Aspiration
- A System Dynamics Modelling for Healthcare Demand and Smartphone-based Technology Adoption in Malaysian Public Hospitals
- Analyses of inter-organizational collaboration for personalized medicine development, and organizational structure suitable for successful outcomes
- Exploring Knowledge Process and Organizational Culture to Promote Individual Learning: An Empirical Study in Science Museums
- Maximization of Energy Safety Using Neuro-Fuzzy Systems
- Alliance Management during Joint Development between Corporations -Investigation into important items when undertaking joint development and examination of a general-purpose model-
- Market Creation for Fuel Cell Electric Vehicles: Infrastructure Dependent New Products and Expectations
- Implicit Patent Alliance Acquiring the Appropriability of Innovation
- Exploratory research on collaboration: Approach to individual, organization and strategy
- A Differentiation System Approach to Industry 4.0 Technology in Indonesian Automotive Supply Chains
- Building Resilience for Global Health Crises Management at A Local Level: A Community-Driven Resilience Framework (CDRF)

# Graduate School Courses Offered in Japanese

For details, please visit the website ▶

RU offers the following Graduate Degree Programs offered in Japanese

※M: Master's Program D: Doctoral Program

## Kinugasa Campus in KYOTO

### Graduate School of Law (M/D)

Since its founding in 1950, the Graduate School of Law has produced many individuals outstanding in their fields, including research academics, complementing the over 100 years of tradition at the College of Law. The school has also achieved admirable results in training highly specialized professionals, such as tax accountants, corporate legal staffs and civil servants.

#### ■ Three courses

- The Legal Specialist Course—Cultivating specialists in areas requiring essential knowledge of the law.
- The Law & Politics Research Course—Deepening academic involvement in the various issues of law and politics.
- The Doctoral Research Course—Fostering future legal researchers.

### Graduate School of Sociology (M/D)

The Graduate School of Sociology was established in 1972 to promote a comprehensive understanding of an increasingly complex world and to tackle issues of modern society in collaboration with many sociological subfields, as well as social policy, social welfare, anthropology, and economic sociology.

#### ■ Four major research fields

- Modern Society  
This research field aims to provide students with opportunities and tools for sociological analysis and insight.
- Human Welfare  
This research field aims to enable students to engage with social issues in human development, welfare policy, and social work practice.
- Sports & Society  
This research field aims to enable students to analyze sports culture and the relation between sports and society.
- Media & Society  
This research field aims to enable students to analyze media culture and media society from various perspectives.

### Graduate School of Letters (M/D)

The Graduate School of Letters offers two majors comprising 13 programs. The school continues to build upon traditional literature studies developing new academic fields incorporating information technology.

#### ■ Two majors and 13 programs

- A major in Humanities—1) Philosophy, 2) Educational Anthropology, 3) Japanese Literature and Linguistics, 4) Chinese Literature and Thought, 5) English and American Literature, 6) Japanese History, 7) East Asian History, 8) European and Islamic History, 9) Modern East Asian Languages and Cultures, 10) Languages, Cultures, and Area Studies of English-speaking Countries, 11) Cultural Dynamics Studies.
- A major in Informatics of Behavior and Cultures—12) Geography and Regional Tourism Studies, 13) Archaeology and Cultural Heritage.

### Graduate School of Science in Arts and Design (M)

The Graduate School of Science in Arts and Design was newly established in April 2026. At the Kinugasa Campus, located in the historical and cultural city of Kyoto, we pursue new, future-oriented design studies which integrate education and research across natural sciences, humanities, and social sciences—grounded in the technologies and sensitivities of art. The aim is to develop a more flexible and higher-dimensional learning environment suitable for a diverse society, utilizing not only real space but also online, on-demand, and virtual space. Creative and flexible thinking will be cultivated. This includes comprehensive skills in “problem-solving,” “reframing,” “co-creation,” “challenge-identifying,” and “innovative thinking,” all backed by a foundation in aesthetics.

In addition to a two-year course for students from various fields of undergraduate studies, a one-year course is offered mainly for working professionals. The one-year course offers two specialized programs. The first, “New Domain Design Strategy (NDS),” focuses on developing the mindset and abilities needed to generate new concepts for social good. The second, “New Domain Art Direction (NAD),” emphasizes expertise in digital archiving and the orchestration of diverse creative experiences.

## Graduate School of Language Education and Information Science (M)

The Graduate School of Language Education and Information Science offers three courses, two focusing on language education (English and Japanese) and one on linguistics and studies of communication and expression. For language education, the aim is to develop the teaching skills of future and practicing teachers. In addition, other aims include innovation in language education practice, teacher and student development, and research on issues in second language acquisition. For linguistics and studies of communication and expression, students can focus on various subdisciplines and conduct significant research in these areas.

#### ■ Three courses

- English Language Education Course
- Japanese Language Education Course
- Course in Linguistics and Studies of Communication and Expression

## Graduate School of Core Ethics and Frontier Sciences (Integrated Doctoral Program)

The Graduate School of Core Ethics and Frontier Science was established for the purpose of examining and seeking solutions to the problems that have been passed down to the 21st century and making approaches to common issues for all humanity from the four perspectives of Publicness, Life, Social-Cultural Symbiosis, and Representation, with an emphasis on core ethics. We adopt integrated doctoral program consisting of transversal lectures and exercises from different fields.

#### ■ Four field themes

- Publicness—Publicness in the 21st century
- Life—Life as an Issue
- Social-Cultural Symbiosis—Possibilities and Limitations in Social-Cultural Symbiosis
- Representation—Analysis of Culture and Art through Representative Theory

## Suzaku Campus in KYOTO

### School of Law (Juris Doctor Program)

The School of Law nurtures “Global-Citizen Lawyers” who think and act based on a global perspective and common sense. We cultivate students who possess a sense of humanity, a strong awareness of human rights, a global perspective, and advanced specialized expertise.

#### ■ Specialized subjects

- Bankruptcy Law, Tax Law, Economic Law, Intellectual Property Law, Labor Law, Environmental Law, International Private Law and International Public Law

## Graduate School of Professional Teacher Education (Master of Education)

The Graduate School of Professional Teacher Education nurtures highly skilled teachers who have the ability to tackle issues that are getting more and more complicated at schools.

We aim to combine theoretical education and practical training and cooperate with not only our affiliated schools but also other schools in Kyoto, Shiga and Osaka where the University has its campuses so that we can provide unique programs associated with a series of fieldwork and a long-term internship to the students. The students will learn from various type of teachers, from experts in education study to instructors with experience of teaching, and are expected to acquire excellent skills required for teachers and school leaders. We offer 3 courses, 1) Clinical Research on Human Development and Education, 2) Educational Methods and Learning Sciences, and 3) International Education which propose the distinctive education of Ritsumeikan University.

## Biwako-Kusatsu Campus in SHIGA

### Graduate School of Sport and Health Science (M/D)

The Graduate School of Sport and Health Science aims to foster highly-specialized professionals and researchers who have expertise in the field and advanced practical and leadership skills as well as the capacity to contribute to society. The school supports your research with top-level faculty and cutting-edge facilities and equipment.

- Two courses in the Master's program
  - Sport and Exercise Science—Focusing on education and research to analyze sports performance from a scientific approach and to elucidate the maintenance and furtherance of health based on scientific evidence.
  - Sport Pedagogy and Management—Focusing on education and research to improve student's educational and management abilities in the field of sport and health science.

### Graduate School of Gastronomy Management (M/D)

The Graduate School of Gastronomy Management aims to rear a new generation of highly skilled professionals and researchers who possess practical managerial skills by research economic activities related to gastronomy using their expertise in economics and business administration.

- Three social priority issues
  - Management and innovation in the gastronomy industry
  - Creating a multicultural community through gastronomy
  - Welfare and health coordination through gastronomy

## Osaka Ibaraki Campus in OSAKA

### Graduate School of Business Administration (M/D)

The Graduate School of Business Administration is a strong academic community that provides a solid practice ground for future business leaders and academic researchers. The school acknowledges the need to respond to the tumultuous global market and increasingly globalized business competition. Our research consists of seven fields, each focusing on the global issues and the latest academic debates. The students will expand their research into practical business agenda, and are expected to become truly influential leaders of the future generation of business practice and management research.

- Seven research fields
  - Technology Management and Strategies, Organization and Human Resources, Marketing, International Business, Accounting, Finance, and Design and Management.

### Graduate School of Human Science (M/D)

The Graduate School of Human Science has established a new academic research field, "Human Science in Practice," since 2022. Faculty members and graduate students are working together to actualize the new academic field of human science.

- Research Fields
  - Psychology: Offers courses including cognitive psychology, developmental psychology, educational psychology, and research methods to expand students' academic understandings on psychology.
  - Human Science in Practice: Offering courses that deepen understandings on human science in practical settings, such as community psychology, social psychology, law and criminal justice, intervention modalities, and behavioral sciences. Also, courses putting Problem Based Learning into practice are offered.
  - Clinical Psychology: Offers courses that correspond to the curriculum stipulated by the Japanese Certification Board for Clinical Psychology. Our school is a Type I accredited graduate school for Clinical Psychologists.

### Graduate School of Image Arts (M)

The Graduate School of Image Arts leverages all the benefits of Ritsumeikan's organization as a comprehensive university to provide broad education, aiming to cultivate skills, techniques and analytical methodology related to visual image production (extending beyond the making of visual image products and including development and application) and visual image studies as well.

- Subject Zones
  - Film Arts
  - Game Entertainment
  - Content Business Management
  - Creative Technology
  - Society and Images

### Graduate School of Management / MBA (M)

The Graduate School of Management, known as Ritsumeikan University Business School (RBS), provides MBA education focused on developing business leaders ready to shape the future. The teaching approach goes beyond lectures to include discussions based on case studies and group projects. From experienced faculty, students acquire practical knowledge and skills, enhancing their ability to think critically and creatively by integrating theory and practice.

- Two majors
    - Major in Management—Aims to train business leaders for general business fields.
    - Major in Tourism Management—Aims to train business leaders in the tourism industry.
- Both majors offer two tracks: The Management Development Track focusing on advanced management expertise and the Career Development Track focusing on basic business skills and mindsets.

# Application Information

## ■ How to Apply

Ritsumeikan University releases application information approximately 1 year before admission.

**Step1. Find out more about the programs we offer by visiting our website.**

<https://en.ritsumei.ac.jp/admissions/>

**Step2. Obtain the guidelines and read carefully.**

**Contact the department in charge of your desired program of study.**

**Applying via Scholarship-based Admissions :** (Ex. Monbukagakusho (MEXT), Asian Development Bank)

■ International Center at BKC: [cger-bkc@st.ritsumei.ac.jp](mailto:cger-bkc@st.ritsumei.ac.jp)

•Please check our site beginning from October 2026 for more information on how to apply for scholarships for the 2027 academic year.

**Applying as a Self-financed Student :**

■ Graduate School of International Relations: [ir-adm@st.ritsumei.ac.jp](mailto:ir-adm@st.ritsumei.ac.jp)

■ Graduate School of Economics: [gs-ec@st.ritsumei.ac.jp](mailto:gs-ec@st.ritsumei.ac.jp)

■ Graduate School of Science and Engineering: [se-admw1@st.ritsumei.ac.jp](mailto:se-admw1@st.ritsumei.ac.jp)

■ Graduate School of Life Sciences: [gsls@st.ritsumei.ac.jp](mailto:gsls@st.ritsumei.ac.jp)

■ Graduate School of Pharmacy: [gsph@st.ritsumei.ac.jp](mailto:gsph@st.ritsumei.ac.jp)

■ Graduate School of Policy Science: [gsps-adm@st.ritsumei.ac.jp](mailto:gsps-adm@st.ritsumei.ac.jp)

■ Graduate School of Information Science and Engineering: [gsise@st.ritsumei.ac.jp](mailto:gsise@st.ritsumei.ac.jp)

■ Graduate School of Technology Management: [moten@st.ritsumei.ac.jp](mailto:moten@st.ritsumei.ac.jp)

**Step3. Submit all application forms.**

**Send all your application documents during the application period.**

**Sample list of required application materials (for a full list, please see the guidelines)**

- Application for graduate admission at RU
- Letter of recommendation
- Research proposal
- Certificate of graduation
- A photocopy of applicant's passport information page
- Proof of linguistic talent / practical expertise (TOEFL®test, TOEIC®test, etc)

## Frequently Asked Question

### Q1. What are the application requirements?

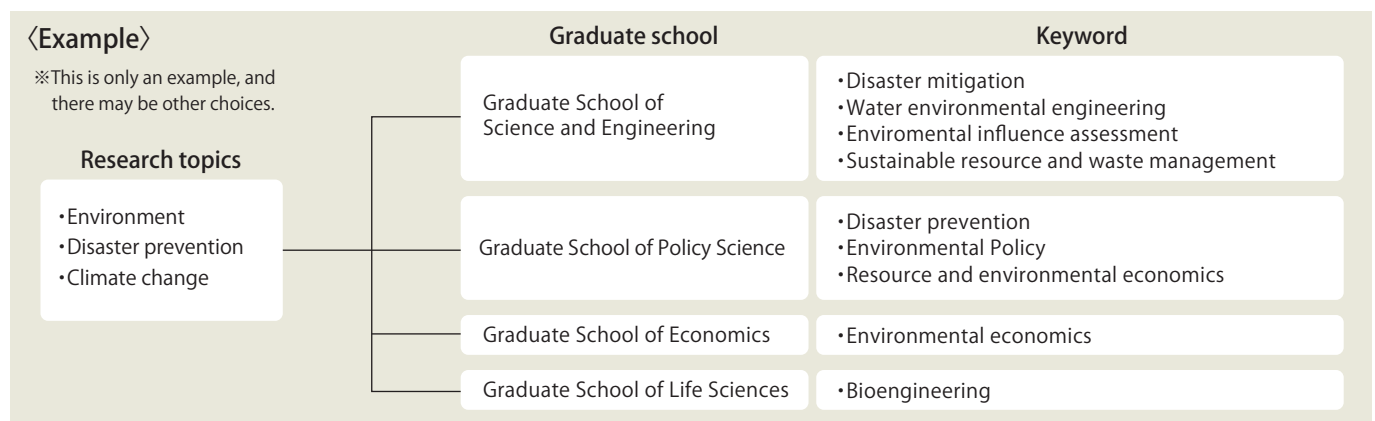

Requirements differ based on the graduate schools and their procedures. Please review the Application Guidelines of each graduate school and check the appropriate eligibility criteria mentioned in "Eligibility Requirements".

### Q2. What is the screening method like?

Screening is conducted mainly based on submitted materials. Written tests and / or interviews are also conducted in some graduate schools. Please refer to the Application Guidelines for details.

### Q3. How can I find my desired major and supervising professor?

RU has many graduate schools and research areas may be offered by one or more graduate schools. Prospective students are expected to find out which graduate school offers a program related to their area of research interest and decide from which faculty member they should receive supervision by checking the website for each graduate school or the laboratory of each faculty member before applying.

General information of each graduate school is available in the "Guidebook Brochure" or on the Ritsumeikan University website.

#### Guidebook Brochure

<https://www.ritsumei.ac.jp/gr/download/index.html/>

#### Ritsumeikan University website

<https://en.ritsumei.ac.jp/academics/>

You can also find a potential supervisor by entering keywords such as dissertation titles or research topics, in the "Ritsumeikan University Researcher Database" shown below.

#### Ritsumeikan University Researcher Database

<https://research-db.ritsumei.ac.jp/rithp/TOP?lang=en>

### Q4. Is it possible to directly contact the professor who I would like to be my supervisor?

You are able to contact faculty directly if they have made their email address available on the graduate school's website, Researcher's Database, etc.

### Q5. How can I obtain a student visa before coming to Japan for the first time?

The International Center will help international students who are entering Japan for the first time to obtain a student visa. Please ask the administrative office of your graduate school after passing the entrance examination.

### Q6. Is Japanese language ability required?

If you wish to enroll in one of the English-based programs shown on pp. 16-31, Japanese language ability is not required. Each of these programs, including lectures, is conducted entirely in English.

That being said, some knowledge of Japanese language will help you adjust to life in Japan. RU offers "Language Support Programs" to international graduate students. Please refer to p. 14.

(If you are interested in one of the Japanese-based programs shown on pp. 32-33, Japanese language ability is mandatory. See the Application Guidelines of each graduate school for specific criteria. Please note that some, but not all, of the graduate schools require JLPT N1 or the equivalent.)
