December 8, 2026, Tuesday

13:30-14:30

Dr. Nguyen Anh Tuyet

Lecturer, University of Economics and Business, Vietnam National University, Hanoi
Research Fellow, University of Economics Ho Chi Minh City (UEH)

Presentation

Cash Transfers and Socioeconomic Behavior among Older Adults in Vietnam: Evidence from a Regression Discontinuity Design

The rapid aging of populations in countries such as Vietnam has prompted the introduction of social pension programs aimed at improving the welfare of older adults. However, the relatively low level of cash transfers may not fully offset socioeconomic behavioral responses among older adults. Using a fuzzy regression discontinuity design, this study examines the impact of social pension receipt on expenditure patterns and material hardship among older adults in Vietnam.

Moderator

Dr. Ammar Khashan

Associate Professor, Ritsumeikan Asia-Japan Research Organization, Ritsumeikan University
