 - ▶ Check the status of responses to each Tests
 - ▶ Improved “Usage Data” screen for course member list
 - ▶ Ability to display a list of assignment submission (Checking) statuses
- ◆ Other
 - ▶ bug fixes

< Instructors · Students >

Registration function for content Checking status (1)

◆Outline

Add a function to the content function that allows students to register their own content Checking status.

This makes it easier for students to manage their own content review status and for instructors to monitor each student's content review status.

You will be able to.

◆Registration of content Checking status (students)

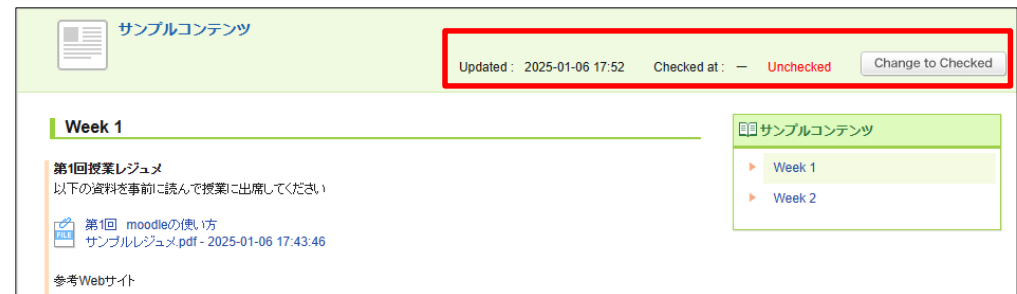

Add the following to the content header

- Button to change Checking status
(Change to Checked, Revert to Unchecked)
- Checking status
(Unchecked, Checked, Unchecked since updated)
- Check date and time

Students use buttons, and can register/change their own Checking status.

Note that the "Checking Status" is not for each page and the registration is for the entire content.

Contents Screen (Student)

◆Content verification status management (student)

The status of each content check is on the top screen of the course.

The icon on the contents list screen allows you to check the contents.

If the instructors member updates the content after Checking, it is easier to keep track of updates because it is automatically displayed as "Unchecked after updating".

Course Top Page (Student)

Contents List Screen (Student)

< Instructors · Students >

Registration function for content Checking status (2)

◆Content Checking status (instructors)

Instructors can track each student's content review status in two ways

(1) Grasp from the "Checking status" link newly displayed in the header of the contents page (to be used when only the Checking status is to be grasped).

(2) Grasp from the screen of the existing function " Access Data " of the contents (newly added columns of " Checked (status)" and " Checked at ").

You can also check the viewing status of the download file.

If you want to check the content Checking status of each student with a list of Tests and other assignments, please refer to the list of assignment submission (Checking) status on p. 21.

(1) Checking Status Screen (instructors)

Content Header

Checked at : —	Unchecked	Change to Checked	Checking status
----------------	-----------	-------------------	-----------------

Name	ID Code	Checked	Checked at
Office of Academic Affairs	0100219	Unchecked	-
mitsuki kinugasa	10000000001	Checked	2025-03-17 15:56
seseragi kinugasa	10000000002	Unchecked	-

(2) Content Viewing Checking Screen (instructors)

Name	ID Code	Status	Viewed at	Checked	Checked at
Office of Academic Affairs	0100219	Unread	-	Unchecked	-
mitsuki kinugasa	10000000001	Read	2025-03-17 15:40	Checked	2025-03-17 15:56
seseragi kinugasa	10000000002	Unread	-	Unchecked	-

This shows the viewing status which indicates whether the page is accessed or not.
*Conventional function

Added as a new feature.
"Checking Status" of overall content which students can register is displayed.

< Instructors >

Real-time updating of Tests/Surveys aggregate results screen

◆Outline

The Tests/survey submission status list screen- the aggregate results displayed in the “View Aggregate Results” section can be updated in real-time.

The “Auto Update” toggle button appears in the accepted aggregate results. By turning it on, the latest aggregate results are automatically loaded every few seconds.

*If the application is resubmitted, the new answer replaces the old one.

*Real-time updates are performed only on the currently open tab (if multiple tabs are open, only the active tab is enabled).

Passing grade on Assignments/projects

◆Outline

In addition to tests, you are able to set passing conditions for reports and projects at the time of assignment.

The passing grade can be registered by the instructors member at the same time as grading. Successful completion will also be indicated on the student's screen.

*Passing of the Assignments/projects can be used as a prerequisite for the Tests.

*Batch registration of passes can also be completed from the grading sheet. (Projects can only be completed from the grading sheet.)

Passing Condition Setting Screen

Files	<div>File name Select file ファイルを選択 選択されていません Add <small>* After selecting a file, click "Add." * Currently, to reduce the load on the system, the file size limit is 20 MB for each individual file. * Before uploading, use antivirus software to make sure your files are clean.</small></div>
Publish Description and Files	<input checked="" type="radio"/> Show always <input type="radio"/> Open once the assignment is published
Passing conditions	<div>If you set to "Enable", you can register the pass results for students. You can make these registered pass results as prerequisites for students to take other tests. <input type="radio"/> Enable <input checked="" type="radio"/> Disable</div>

Adding a passing grade on the Assignments/projects as a prerequisite for the Tests.

◆Outline

In addition to tests, assignments and projects can be chosen as prerequisites for students to take the tests.

*There is no change in the fact that the assignments for which prerequisites can be set are only Tests and Exercise.
(You cannot set prerequisites for Assignments, projects, etc.)

The image shows two screenshots from a learning management system. The left screenshot shows a dropdown menu with options: Edit, Export, Set Prerequisites (highlighted with a red box), Submission Status, Manage Grades (Excel), Trial Submission, and Delete. A red arrow points from the 'Set Prerequisites' option to the right screenshot. The right screenshot shows the 'テスト 1' (Test 1) page. It asks 'Would you like to set the prerequisites of this test?' with radio buttons for 'Do not set' and 'Set' (selected). Below are three sections: 'Tests', 'Assignments', and 'Projects'. Each section has a 'Prerequisites' header and a list of items with checkboxes. In the 'Tests' section, 'Autoscore test2 (1 points or more) * currently unpublished' and 'Exercise ドリル含否テスト (11 points or more)' are listed. In the 'Assignments' section, 'Individual 201408-CL-19テスト用レポート * currently unpublished' is listed. In the 'Projects' section, 'kojin * currently unpublished' is listed. The 'Assignments' and 'Projects' sections are highlighted with a red box. At the bottom, there are radio buttons for 'AND (must satisfy all conditions)' and 'OR (must satisfy at least one condition)'.

< Instructors >

Pass input available when grading Tests

◆Outline

A new manual pass registration/deregistration menu is added to the manual and automated scoring Tests and Exercise.

Tests and Exercise with pass conditions have been registered automatically based on the results of the scoring.
It can be easily changed on the administration screen or from the scoring sheet (*).

*Exercise can only be operated from the administration screen. Checking and overwriting of grading results in Excel is not supported.

test2: mutsuki kinugasa's Questions and Answers

Grade	Answers

< Instructors >

The number of words and characters in the online input Assignments will be displayed on the “Assignment Evaluation Sheet”.

◆Outline

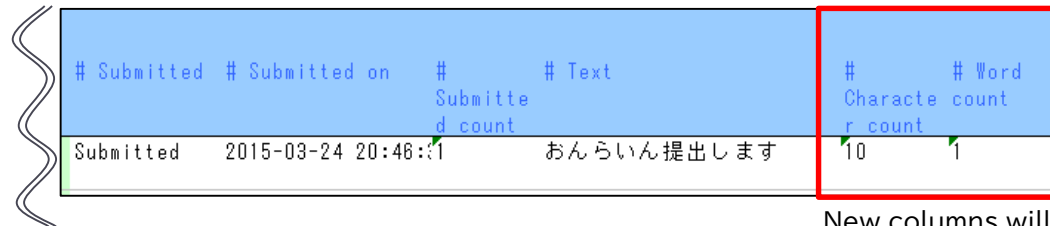

The word and character counts of submitted Assignments were previously available only on the web-based grading screen, but it changes that they are also displayed on the Assignment Evaluation Sheet. (*1) (*2)

* 1 Online input Assignments only. File transmission Assignments cannot be output.

* 2 The counting system used on the “Web-based evaluation screen” and the “Assignment Evaluation Sheet” is different, so there may be differences in the number of characters or words counted (e.g. Arabic, Indian languages, etc.). There is no difference in results for alphanumeric characters, Kana, and Kanji.

When grading based on character and word counts, use the same counter that students use as a guide when entering their responses ” Web-based evaluation screen“.
(see also the figure on the right).

Assignment Evaluation Sheet Image (New Feature)

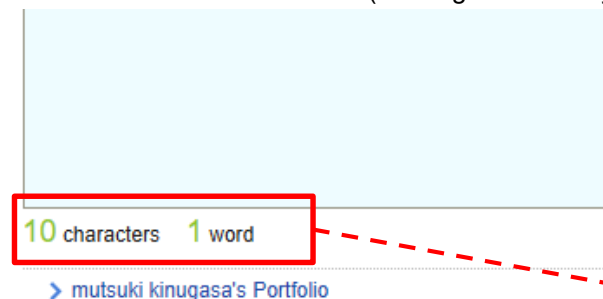

The image shows a screenshot of an Assignment Evaluation Sheet. It features a table with columns for submission details and counts. The 'Submitted' column contains the text 'Submitted', the 'Submitted on' column contains '2015-03-24 20:46:11', and the 'Text' column contains 'おんらいん提出します'. The 'Character count' column shows '10' and the 'Word count' column shows '1'. A red box highlights the 'Character count' and 'Word count' columns, with a note indicating that these new columns will be added.

# Submitted	# Submitted on	# Submitted count	# Text	# Character count	# Word count
Submitted	2015-03-24 20:46:11		おんらいん提出します	10	1

New columns will be added.

Web-based evaluation screen (existing functionality)

The word count and word count counters that students use as a guide when submitting their work match the screen shown here. (*2)

< Instructors >

Projects: Team grade registration function

◆Outline

A score registration screen for each team (total team score, team evaluation, and team critique) is added to the projects function.

Registered team scores are also output to the scoring sheet, so they can be used as reference information when registering individual scores.

*Only the instructors member in charge of the team can view the registered team grades. They are made available to students.

(1) Projects Management Screen

Please check the submitted answers and register grades by clicking on the Manage menu (⚙️).

Check the status of responses to each Tests

◆Outline

A new "Question Analysis" menu item to the summary selection and operation of Tests Administration is added.

You can download the aggregate results of the following information for the selected automatically scored Tests in Excel format.

- **Question type**
Multiple(1), Dropdown, or other answer format
- **Correct answer rate**
Percentage of answers that were correct out of the total number of answers
- **Number of answers**
Number of answers submitted
- **Number of correct answers (exact)**
Number of answers that were correct
- **Number of correct answers (partial)**
Total number of checkboxes/dropdowns correctly selected in Multiple(2) choice and Matching questions

*There are some questions for which the number of answers or percentage of correct answers cannot be obtained depending on the "Question Type" or "Answers and Points" settings. For details, please refer to the manual after the upgrade.

It is also possible to perform tasks such as picking up questions with low percentages of correct answers across multiple tests.

< Instructors >

Improved "Usage Data" screen for course member list

The course member list "Usage Data" screen is changed to more clearly show the status of each student's efforts.

1. Graphical display of submission status
Improve the visualization of each course member's progress.
1. Improvement on the denominator of the number of submissions
In courses where projects assignments or group assignments with an open scope are given, the number of assignments for each student is working on varies. To accommodate this, the denominator of the number of submissions is changed as follows
 - (Before change) Number of assignments published in the course
 - (After change) Number of proposals that have not been submitted by eligible students + Number of proposals that have been submitted so far

Ability to display a list of submission status (detail)

◆Outline

A screen is added to list course members' submission status and content Checking status (progress) for each assignment. This allows you to monitor the overall learning status and provide careful support to individual students according to their learning progress.

◆Display target

The following are the targets of this function.

- Test submission status
- Number of exercise submission
- Survey submission status
- Assignment submission status
- Resource checking status

Depending on your environment, the displayed information may vary.

If you want to check the response details of each assignment, you can access the response details screen for each assignment by clicking on the "D" link (for Exercise, it shows the number of submissions) in the Submission Status. (For content, the link takes you to the top of the content page.)

If you want to analyze the details by yourself, you can download the submission status (batch process) and output the data as an Excel file.

Course Member List > Usage Data with a link to Submission status (detail) screen.

Submission Status (Details) Screen

The screenshot shows the 'Submission Status (Details) Screen' with a filter section and a table of student submission data. A red box highlights the table.

Name	ID Code	第1回小テスト	第1回ドリル問題	学習理解度アンケート	第1回レポート課題	プロジェクト課題	講義資料
student01	01	D	N	N	D	D	N
student02	02	N	N	N	N	D	N
student03	03	N	[2]	D	N	N	D
student04	04	N	N	N	N	N	N
student05	05	N	N	N	N	N	N

<Other Changes・Bug Fixes>

◆ For instructors

- ◆ Removal of restrictions on editing questions for in-progress Exercise

To edit a question ever used in a Exercise, it needed to exclude the question from the Exercise.

However, the above limitation will be eliminated to allow correction of typographical errors, etc., even on issues in use.

*If you rewrite the correct answer or the distribution of points, it may not be calculated correctly.

Please note that if you have already submitted a response, etc.

- ◆ Changes to the access log screen

In the “Access log” checking feature that instructors can view from course settings and the submission status screen, the notation “PC version” and “smartphone version” to indicate the type of manaba page URL accessed end.

*This is because one year has passed since the end of the old smartphone version in March 2024, and the period for displaying logs that can be distinguished between the above types has ended.

◆ Other Corrections

- ◆ Correction of minor wording in screen descriptions, etc.
- ◆ Partial revision and addition to the basic manaba manual
- ◆ Some corrections and additions to the manaba options manual
