## Allow to check unsubmitted answers and finalize the submission in exercises

### ◆Outline

Instructors were not able to see students' answers to exercises prior to submission, however, now the answers can be shown even in a saved state as well as the tests, and instructors are able to finalize submission on behalf of the student.

1. On the Submission Status screen of exercise, click the name of the student when “\*Saved data” is displayed in the row of the student whose data is in the process of being answered.

2. Click “Check unsubmitted answers”.

3. If you find no problem for the submission, click “Finalize Submission”.

\*Answers that have been finalized for submission are treated as if they were submitted by the student him/herself.

\*Answers to exercises cannot be withdrawn and restored to unsubmitted once they have been finalized for submission.

Name	Student ID	Taken	Passed	Best Score	Average Score
mutsuki kinugasa	10000000001	Not submitted [Log]	-	-	-
seseragi kinugasa	10000000002	Not submitted *Saved data [Log]	-	-	-

## < Instructors ▪ Students >

If the portfolio settings are changed, it adapts to the answers already submitted (through tests, surveys, and projects)

---

### ◆ Outline

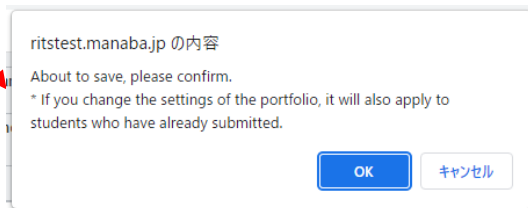

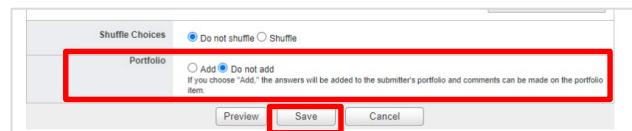

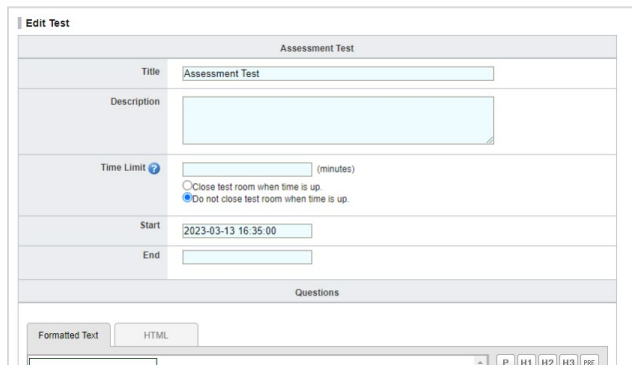

- If you change the settings of portfolio and save the changes when editing **tests (not exercises), surveys, and projects**, it also applies to **answers that have already been submitted**.

\*Reports already have the above specification.

\*Exercises cannot be applied to students who have already submitted them, even if you change and save the settings of portfolio when editing.

- Even if the setting is either "Add" or "Do not add" for the settings of portfolio, it can be changed to the other setting and applied to existing submissions.

- Add a message “\*If you change the settings of the portfolio, it will also apply to students who have already submitted” as a confirmation when clicking save button while editing an assignment.

# <Instructors · Students> Dialog notification upon failure of autosave while answering (through tests and surveys)

## ◆Outline

If poor internet connection or session inactivity occurs while answering a test (including an exercise) or survey, answers cannot be automatically saved. The system detects this failure and displays a notification on the screen.

## <Corresponding cases>

(1) When the internet is disconnected (went offline)

(2) When a session becomes invalid (\*1)

\*1 This occurs when the user logs out from a different tab, or when the SSO authentication session expires etc.

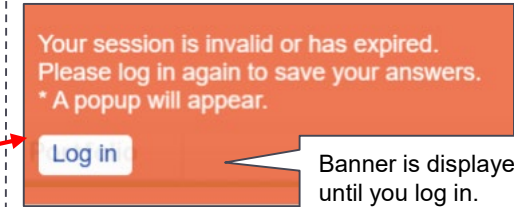

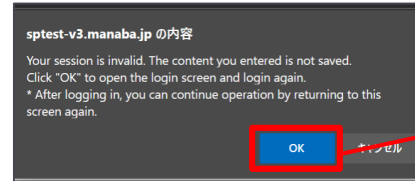

## <Notification Method>

When the above case (1) or (2) occurs at the timing of automatic saving of answers, the dialog box and banner in the right figure are displayed.

While the banner is displayed, screen reloading is not permitted even if the button is clicked for preventing the data from being lost before autosave.

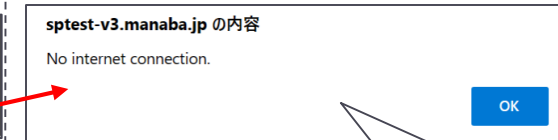

\*Confirmation dialog is displayed only once per answer.

\*The banner will continue to be displayed until the internet connection status/session is restored.

Banner is displayed until you log in.

⇒ Clicking "OK" or "Log in" above opens the login screen in a separate tab, and once you log in, autosave will resume in the original tab.

Banner is displayed until the internet connection is reconnected.

⇒ Dialog and banner will automatically disappear when the internet connection is restored.

## <Students>

### Change in timing of discontinuation of the old version of smartphone screen

#### ◆Outline

In consideration of customer usage, we have decided to postpone the discontinuance of the old version of smartphone-optimized screen, which is currently provided via the dedicated URL.

- Before change : Version Upgrading in spring 2023 (\*)
- After change : Version Upgrading in summer 2023

\*Previously published in the notice of upgrading.

In line with the above, a notice of new discontinuance period is displayed on the My Page screen. (Figure 1)

The summer version upgrade in early September will be implemented on different dates depending on the environment in which the software is used. The implementation date will be announced by the support desk via e-mail between around the end of July and the beginning of August.

Please continue to inform for the migration to use the "New Smartphone Version". (Figure 2)

Figure 1: Display image when accessing the old smartphone version

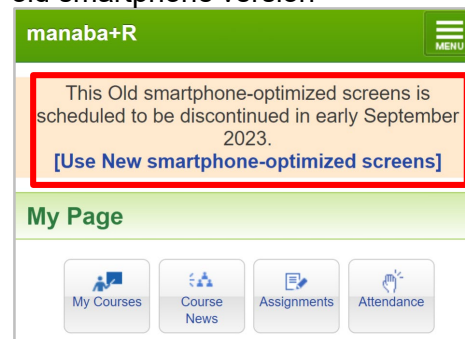

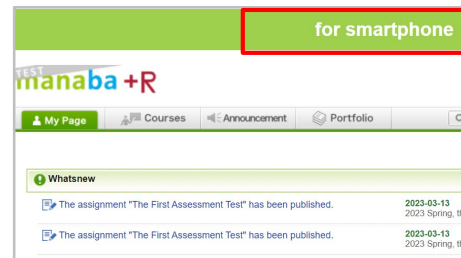

Figure 2: How to switch to the new smartphone version

Access the URL of PC version from your smartphone and tap the link in the red frame to access the new smartphone version.

## <Instructors>

Views in Project's "Total Views" and "Last Access" are counted even in other than team space.

### ◆Outline

Until now, only accesses within team space were counted in the following screen.

- Total Views in Team Progress
- Last Access in Access Data

In addition to above, access to the following screens is also counted (see figure on the right).

- Project Submission screen
- The mutual viewing screen of Project Assignments

\*Even if you have been submitting assignments or viewing mutually without accessing the team space in Project, you will now be able to check the usage status as access within the Project.
