

Part2

Learn about today's Ph.D. Students & Cheers to the Next Generation of Advanced Professionals!

Participation: free

Purpose

To promote better understanding of Ph.D. Students, an opportunity to grow together, engage, enhance skills and learn about society, Ph.D. Students will talk about themselves and their research activities.

In our vision, experts from Kyoto and Nara's outstanding universities and companies engage in meaningful exchange and discussion related to their research activities, fostering collaboration. We hope to see all participants expand their horizons and find opportunities to apply the insights they gain, to future research and initiatives. Unlike academic conferences, this event will provide a platform for students to cultivate a mindset connecting academia and society, develop their careers, and acquire transferable skills. For professionals, it will be an opportunity to engage in meaningful dialogue with students, gain a deeper understanding of future experts, and foster collaboration. The event will feature Ph.D. Students elevator pitches, poster presentations and industry-academia exchange. Undergraduate and Master's Students interested in pursuing a PhD are also very welcome.

In addition, we have prepared a mini-lecture for International Students and persons preparing to make presentations in English (details to be provided separately).
