

AY2022 Ritsumeikan University +R Undergraduate College
Scholarship
-College of Information Science and Engineering
Selection Guidelines

Introduction

The +R Undergraduate College Scholarship aims to support students in each College who have obtained excellent grades in curricular subjects, who possess problem awareness gained through specialized undergraduate study, general education (e.g., teacher training, liberal arts and sciences, foreign language education), study abroad or international study activities, and who achieve excellent learning outcomes by developing this awareness with the aim of pursuing specific topics of study. In this way, the scholarship aims to encourage such students to serve as models for learning and growth among their peers.

The College of Information Science and Engineering will accept applications and select applicants on the basis of this outline.

1. Student profile envisioned by College of Information Science and Engineering for College Scholarship
 - (1) Matters related to interests, motivation and attitude
 - Students must have a wide-ranging and strong interest in an academic field related to information technology
 - Students must be actively working to acquire the ability to be able to solve problems and create new areas of research
 - Students must consider matters in a multi-faceted manner from a global viewpoint and always be thinking of making a contribution to society

(2) Grade criteria

(1) Ranked in the top 50% of students in the same student year based on GPA in preceding academic year spring semester or fall semester.

(“Ranked in the top 50% of students based on GPA obtained in preceding spring semester” or

“Ranked in the top 50% of students based on GPA obtained in preceding fall semester”.)

*The benchmark GPA will be announced on manaba+R on May 13 (Thursday).

(3) Students who have been suspended on disciplinary grounds pursuant to Article 57 of the Ritsumeikan University Regulations cannot apply in the academic year that includes the period subject to the disciplinary measures.

(4) This scholarship can be issued up to two times to the same recipient in the period up to graduation.

7. Application documents (content details)

(1) Activity Plan Application Form

① What you want to do if you obtain the scholarship

② What you have learned through the course of your studies and student life to date

③ Activity plan

④ Expected outcomes

⑤ Method of publishing outcomes

(2) Outcome Screening Application Form

① Achievement of the purpose

② What you have learned through the activity

③ Results of the activity

④ Achievement for the expected outcomes

⑤ Results of publishing outcomes, Improvements

8. Selection criteria and method

After confirming of meeting the application qualifications in 6, the application will be reviewed based on the overall achievement of the proposed objectives and its results.

9. Notification of results

The Dean of the College of Information Science and Engineering will inform scholarship students that they have been selected and notify them of the post-selection procedures via manaba+R on January 16, 2023 (Monday).

10. Announcement of scholarship students

The names and courses of the scholarship students will be posted on manaba+R (internal access only).

11. Roles and obligations of scholarship students

Scholarship students are required to give presentations (including poster presentations) at activity

report meetings and other gatherings if requested by the University.

12. Payment method

Recipients who have completed the required procedures will receive the funds as a lump-sum payment. The payment will be transferred into the accounts nominated by recipients.

13. Termination of payments

If, during the course of the scholarship tenure period, scholarship recipients lose their enrollment status, are suspended based on disciplinary grounds, or fail to meet their obligations as scholarship recipients without justifiable grounds and so on, the scholarship payments will be terminated, and a refund may be requested in some cases.

Check the regulations for details.

14. Other

Please refer to the regulations for each scholarship regarding the eligibility of receiving the Undergraduate College Scholarship concurrently with external scholarships.
